**TECHNOLOGY AND THE OUTLOOK
FOR THE U.S. AND NEW JERSEY
ECONOMIES**

Cities are the "comeback kids," owing in part to the longest and strongest economic expansion in U.S. history. The increasing dependence on technology by all businesses has brought about an explosion of dot.coms to satisfy the seemingly infinite demand for efficiency.

**REINVENTING THE CITY
WITH BRICKS AND CLICKS**

Newark and Jersey City have benefited from suburban property markets, many now at capacity, and rising New York City prices. Although the two cities' comebacks are quite different, virtually every aspect of their redevelopment has been influenced by technology. What is the turnaround really about and what are the prospects for the future?
