September 2004

## Agenda

- History and purpose of reserves
- Reserve requirement calculation
- Clearing balance requirements
- As-of adjustments
- Account maintenance and position
- Deficiencies, penalties and waivers
- ReserveCalc

## History \& Purpose of Reserves

## Overview

- Legislation affecting reserve requirements
- Goals of Monetary Policy
- The link between Monetary Policy and the Reserves Market
- Instruments used in the implementation of Monetary Policy

## Federal Reserve Act (1913)

- Section 19 of the Act empowers the Federal Reserve to require depository institutions to hold a portion of their deposits as a reserve.
- This fractional reserve system is one of the tools used to implement monetary policy.

## Federal Reserve Act (1913)

- Section 19 of the Act is codified in Regulation D.
- Regulation D details the following:
- Definition of a deposit
- Definition of types of deposits
- Computation and maintenance rules for reserve requirements
- Form of reserves

## Federal Reserve Act (1913)

- Regulation D details the following: (continued)
- Deductions from reserve requirements
- Carryover rules
- Transitional adjustments for mergers
- Supplemental and emergency reserve requirements
- Penalties
- International Banking Facilities

## International Banking Act (1978)

- Brought foreign banks in the U.S. within the federal regulatory framework
- "Leveled the playing field" between domestic and foreign banks
- Key provision for reserve requirements: ALL U.S. branches and agencies of foreign banks are subject to reserve requirements

## Monetary Control Act (1980)

- Reformed reserve requirements to end the problem of banks leaving the Federal Reserve System
- Imposes reserve requirements on all institutions that have transaction accounts, non-personal savings and time deposits, or Eurocurrency liabilities
- Established an exemption amount

## Monetary Control Act (1980)

- Key provisions for reserve requirements: ALL depository institutions are subject to reserve requirements including:
- Member/nonmember commercial banks
- Thrift institutions (including credit unions)
- U.S. branches and agencies of foreign banks
- Edge and agreement corporations
- Created a two week computation and maintenance periods to allow flexibility in managing reserves

## Garn St. Germain Act (1982)

- Includes a number of provisions to facilitate deregulation of the banking industry
- Key provisions for reserve requirements:
- Requires that institutions with less than \$2 million in reservable liabilities be exempt from reserve requirements
- Requires that this amount be indexed annually based on aggregate growth of reservable liabilities

## Garn St. Germain Act (1982)

- Key provisions for reserve requirements: Changed computation and maintenance periods for transaction accounts to contemporaneous from lagged

## Riegle-Neal Interstate Banking and Efficiency Act (1994)

- Allows interstate banking and branching
- Key provisions for reserve requirements: Allowing banks to have a multi-state presence, required significant changes to the Federal Reserve account structure
- Subaccounts were created

## Who Must Report?

Effective with the September 22, 2003 report, the criteria for determining whether certain depository institutions will file the FR 2900 weekly or quarterly was modified.

## Who Must Report?

Applies to all institutions except for U.S. branches and agencies of foreign banks and Edge Agreement corporations 2004 Deposit Reporting Requirements

| Exempt |  | Nonexempt |  |
| :---: | :---: | :---: | :---: |
| Net transactio m | $\begin{aligned} & \text { ccounts } \leq \$ 6.6 \\ & \text { on } \end{aligned}$ | Net transactio million, OR $\$ 1.074$ billion | accounts > \$6.6 <br> tal deposits $\geq$ duced reporting it |
| Nonreporters | Annual Reporters | Quarterly <br> Reporters | Weekly <br> Reporters |
| Total deposits $\leq$ \$6.6 million | Total deposits > \$6.6 million | Total deposits \$161.2 million | Total deposits $\geq$ $\$ 161.2$ million |

## Who Must Report?

The Federal Reserve will continue to screen institutions, and inform each institution eligible for reduced reporting

## Who Must Report?

FR 2900 weekly: commercial banks, savings banks, savings and loan associations and credit unions

- Total deposits greater than or equal to the "nonexempt deposit cutoff" and "net transaction accounts" above the indexed level, or
- Total deposits above the "reduced reporting limit", regardless of the level of "net transaction accounts"

## Who Must Report?

FR 2900 quarterly: commercial banks, savings banks, savings and loan associations and credit unions

- Total deposits below the "nonexempt deposit cutoff", and "net transaction accounts" above the indexed level

## Who Must Report?

FR 2910a: commercial banks, savings banks, savings and loan associations and credit unions

- Total deposits between the "exemption amount" and below the "reduced reporting limit", and "net transaction accounts" below the indexed level

## Uses of Reserves Data

The primary use of reserves information is for implementing and supporting monetary policy.

## Monetary Policy \& the Reserves Market

- The basic link between monetary policy and the economy is through the market for reserves, more commonly known as the federal funds market.
- Institutions borrow and lend on an overnight basis.
- The interest rate charged for the use of these funds is known as the federal funds rate.

## Importance of Fed Funds Rate

A change in the demand or supply of reserves will result in a change in the federal funds rate which in turn tends to spread quickly to other interest rates.

## Targeting the Fed Funds Rate

- The Federal Open Market Committee defines the target fed funds rate necessary to promote the goals of maximum employment, stable prices, and moderate long-term interest rates.
- Open Market Operations involve adjustment in the supply of bank reserves, relative to reserve demand, in order to achieve and maintain desired financial market conditions.

## Draining Reserves

## Adding Reserves

## Reserves Market

Demand in the Reserves Market is determined by each bank's need to meet reserve requirements as defined in Regulation D.

## Reserves Market

- The supply of reserves is the amount of reserves currently in the market which consists of:
- Discount Window Lending (Borrowed Reserves)
- Nonborrowed Reserves - Influenced by the purchase or sale of securities by the Open Market Trading Desk

## Monetary Policy

- The tools used to implement monetary policy :
- Reserve Requirements
- Discount Window Lending
- Open Market Operations

## Computation Period

Weekly FR 2900:

- The computation period for weekly FR 2900 reporters consists of 14 consecutive days beginning on a Tuesday and ending on the second Monday thereafter.

## Weekly Reporters (FR 2900) Computation Period

Example

FR 2900 Reporting Periods Computation Period

$$
\begin{aligned}
& \text { 08/17/04 (Tues) to } \\
& \text { 08/23/04 (Mon) }
\end{aligned}
$$

08/24/04 (Tues) to 08/30/04 (Mon)

## Reserve Maintenance Period

Weekly FR 2900:

- A reserve maintenance period for FR 2900 reporters consists of 14 consecutive days beginning on a Thursday and ending on the second Wednesday thereafter.

Example 09/16/04 (Thurs) to 09/29/04 (Wed).

## Reserve Maintenance Period

- The reserve requirement to be satisfied during a 14-day reserve maintenance period is based on the daily average level of net transaction accounts during the computation period.

## Reserve Maintenance Period

- The weekly reserve maintenance period starts 30 days after the beginning of a computation period.

| Computation Period | Maintenance Period |
| :--- | :--- |
| $08 / 17 / 04$ to $08 / 23 / 04$ | $09 / 16 / 04$ to $09 / 29 / 04$ |
| $08 / 24 / 04$ to $08 / 30 / 04$ |  |

## Reserve Maintenance Period

- The same lag is used in the computation of vault cash which is applied to satisfy reserve requirements.

| Vault Cash | Computation <br> Period | Maintenance <br> Period |
| :---: | :---: | :---: |
| $\mathbf{0 8 / 1 7 / 0 4}$ to | $08 / 17 / 04$ to | $09 / 16 / 04$ to |
| $\mathbf{0 8 / 3 0 / 0 4}$ | $08 / 30 / 04$ | $09 / 29 / 04$ |

## Reserve Computation Period

Quarterly FR 2900:

- The reserve computation period for quarterly FR 2900 reporters consists of 7 consecutive days beginning on a Tuesday and ending on the following Monday.

Example 9/21/04 (Tues) to 9/27/04 (Mon)

## Reserve Maintenance Period

- The reserve requirement to be satisfied during each quarterly reserve maintenance period is based on the daily average level of reservable liabilities during the 7-day computation period.

| Computation Period <br> (Quarterly) | Maintenance Periods |
| :---: | :---: |
| $09 / 21 / 04$ to $09 / 27 / 04$ | $10 / 27 / 04$ to $01 / 19 / 05$ |

## Reserve Maintenance Period

- A quarterly reserve maintenance cycle usually consists of 13 successive one week maintenance periods that begin on the third Thursday following the end of the computation period.

## Quarterly Reserve Maintenance

09/21/04 to 09/27/04

## Exemption Level

- The exemption level is the amount of an institution's net transaction accounts that is subject to a reserve requirement of zero percent.
- The exemption amount is adjusted annually.
- When calculating reserve requirements, the exemption amount is subtracted from net transaction accounts before the reserve ratios are applied.

## Low Reserve Tranche

- The low reserve tranche is the amount of an institution's net transaction accounts that is subject to a reserve requirement of 3 percent.
- The low reserve tranche is adjusted annually.

## Reserve Tranche

- The amount of an institution's reservable liabilities that is over the low reserve tranche is subject to a reserve requirement of 10 percent.
- Adjusted annually

## Low Reserve Tranche

Example:
Net Transaction Accounts
\$ 100m

- Reserved at 0 Percent
\$ 6.6m
(exemption amount)
- Reserved at 3 percent $\$ 45.4 \mathrm{~m}-\$ 6.6 \mathrm{~m}=$
$\$ 38.8 \mathrm{~m}$
(low reserve tranche)
- Reserved at 10 percent
$\$ 100 \mathrm{~m}-\$ 45.4 \mathrm{~m}=$
$\$ 54.6 \mathrm{~m}$
(amount above low reserve tranche)

## Low Reserve Tranche

- Each depository institution that files the FR 2900 report is allocated the full exemption amount and low reserve tranche.

## FR 2930 Annual Report

- Allocation of Low Reserve Tranche and Reservable Liabilities Exemption.
- Adjusted annually

## FR 2930 Annual Report

- The following institutions share a single exemption amount and a single low reserve tranche even though they file separate FR 2900 reports:
- All U.S. Branches and Agencies that have the same foreign direct parent bank, and
- Edge and Agreement corporations

## Low Reserve Tranche

Example
ABC Bank in Tokyo has three separately chartered branches located in the U.S.
These three U.S. branches would share a single exemption and a single low reserve tranche.

## Reserve Ratios

- Reserve requirements are calculated by applying the reserve ratios to the daily average of net transaction accounts in a computation period.

## Reserve Ratios

- Reserve ratios are applied to the net transaction accounts of all U.S. depository institutions that are required to file the FR 2900.
- The same reserve ratios are applied to weekly and quarterly FR 2900 reporters.

## Reserve Ratios

## Requirement Calculation

- Four steps to calculate your Reserve Requirement (RR):

1. Calculate Daily Average Net Transaction Accounts
2. Apply Exemption
3. Apply Reserve Ratios
4. Add RR at $3 \%$ to RR at $10 \%$ for Total RR

## STEP 1: Calculate Daily Average NTA

- Total FR 2900 Week 1 and Week 2 data for:

Line A3, Total Transaction Accounts
Line B1, Due From U.S. Banks
Line B2, CIPC

- NTA = Total Transaction Accounts (Line A3)
less Due From U.S. Banks (Line B1) less CIPC (Line B2).
- Daily Average NTA = NTA/14

## STEPS 2 \& 3: Apply Exemption \& Reserve Ratios

- Calculate amount of net transaction accounts (NTA) that exceeds the exemption.
- Apply Reserve Ratios:
(1) Multiply by 3 percent the amount of Daily

Average NTA > \$6.6 million but $\leq$ Low Reserve Tranche $\$ 45.4$ million
(2) Multiply by 10 percent the amount of

Daily Average NTA > Tranche \$45.4 million

## STEP 4: Sum Requirement

- Daily Average Reserve Requirement (RR) equals 3\% Requirement plus 10\% Requirement

## Vault Cash

- Vault Cash is calculated by adding week 1 and week 2 together, then dividing by 14 (similar to how NTA was calculated) to derive the daily average.
- Vault Cash is used to satisfy required reserves, and is factored in after reserve requirements and the tranche loss adjustment have been calculated.

## Step Four- Add RR at 3\% to RR at 10\%

RR at $3 \%+\mathrm{RR}$ at $10 \%=$ Daily Average $\mathbf{R R}$

## Report of Required Reserves

- The Federal Reserve Bank of New York calculates reserve requirements and provides a report of required reserves to depository institutions before the start of each maintenance period.

## Report of Required Reserves

- A preliminary report of required reserves is delivered via fax or email to each depository institution on the second Thursday of a maintenance period only if FR 2900 data for that corresponding computation period is incomplete.

## Report of Required Reserves

- However, for those institutions with complete data, a final report of required reserves is delivered on the business day following the day we receive the complete data.

## Transitional Adjustment for Mergers

- When two institutions merge, the surviving institution's reserve requirement is higher than the combined reserve requirements of the merging institutions.
- This is due to the loss of the low reserve tranche and exemption of the nonsurviving institution.

## Transitional Adjustment for Mergers

- The increase in the requirement is phased in over a seven quarter period.

## Example of a Transitional Adjustment for a Merger

## Clearing Balance Requirements

Dean Cornier

## Objectives

- Clearing Balance Requirement Policy
- Define clearing balance requirement
- When and why policy was established
- Why establish and use clearing balances
- Policies and Procedures regarding implementation of clearing balance requirements

## Objectives

- Earnings Credits
- Priced versus non-priced services
- Calculation of earnings credits
- Services eligible to use earnings credits

## Clearing Balance Requirement Policy

- A clearing balance requirement is an amount that an institution may contract (or be required) to maintain with a Reserve Bank in addition to any reserve balance requirement.
- Clearing balance requirements were implemented as a result of the Federal Reserve Act (as amended by the Monetary Control Act of 1980) and the International Banking Act of 1978.

## Clearing Balance Requirement Policy

- A Reserve Bank may impose a clearing balance requirement if an institution has a history of frequent overnight or daylight overdrafts.
- Balances held to meet a clearing balance requirement, up to a limit, generate earnings credits that can be used to offset service charges an institution may incur through use of eligible Reserve Bank services.

## Clearing Balance Requirement Policy

- Earnings credits on maintained clearing balances provide a return comparable to what the institution would receive on funds held with a correspondent.
- The institution can use earnings credits to offset Federal Reserve service charges that settle in its own account.

## Policies and Procedures

- Must have a Federal Reserve Master Account
- $\$ 25$ thousand minimum clearing balance requirement
- Same maintenance period used for reserve requirements applies to clearing balance requirements
- Expected to maintain a daily average balance within a range (Clearing Balance Band).

## Policies and Procedures

- Clearing Balance Band is equal to the greater of $\$ 25,000$ or two percent of clearing balance requirement.

Example 1
Clearing Balance Requirement is $\$ 400,000$
Two Percent of $\$ 400,000$ is $\$ 8,000$
Therefore, the Clearing Balance Band is $\$ 25,000$.

## Policies and Procedures

Example 2
Clearing Balance Requirement is $\$ 1,500,000$
Two Percent of $\$ 1,500,000$ is $\$ 30,000$ Therefore, the Clearing Balance Band is \$30,000.

## Policies and Procedures

- If an institution fails to maintain the daily average balance above the low end of the Clearing Balance Band, then it is considered deficient and a penalty may be imposed.
- If an institution maintains daily average balances in excess of the clearing balance requirement but within the Clearing Balance Band, additional earnings credits are generated.

## Policies and Procedures

- Clearing balance accounts are monitored for both overnight and daylight overdrafts, with penalties imposed if overdrafts occur.
- As-of adjustments can be applied to clearing balance accounts
- Clearing balance requirements can be changed as often as every maintenance period.

## Policies \& Procedures

- Institutions can increase or decrease the level of earnings credits to maintain an amount sufficient to cover billable charges.
- Changes to earnings credits result from changing the clearing balance requirement.

## Policies \& Procedures

- Financial Services
- Clearing Balance Calculator
- WWW.FRBSERVICES.ORG

## Policies \& Procedures

- To change a clearing balance requirement an institution must do the following:
- Contact the Deposit Reports Division in writing and request a change.
- Indicate the current clearing balance, new clearing balance and effective date for the change. Deposit Reports Division staff require 5 days notice prior to the effective date of the change.
- The effective date of a clearing balance change must be the first day of a maintenance period.

## Policies \& Procedures

- Correspondence can be addressed to: The Federal Reserve Bank of New York Attn: Deposit Reports Division 33 Liberty Street
New York, New York 10045
- Alternately, correspondence can be faxed to: (212) 720-5025

## Why Use Clearing Balances

- To hold balances above reserve requirement in order to facilitate clearing needs
- To generate earnings credits to pay for priced services

## Earnings Credits

- Earnings credits can only be used to offset charges for Federal Reserve priced services
- The following are considered priced services:
- Automated Clearing House Services
- Funds Transfer
- Commercial Check Clearing and Collection Services
- Payor Banks
- Return Checks

## Earnings Credits

- The following are also considered priced services :
- Securities Safekeeping Services
- Federal Reserve Float
- Any new services which the Federal Reserve system offers, including but not limited to, Payment Services that affect electronic transfer of funds

## Earnings Credits

- Earnings credits cannot be used to offset charges from non-priced services.
- Non-priced services are those services provided to institutions which are necessary for institutions to monitor and manage their account. Non-priced services are:
- Accounting Information Services
- Cash Management Services

## Earnings Credits

Eligible earnings credits are calculated based on the following formula every maintenance cycle:
[ (Eligible Clearing Balances $\times 90$ Percent x Average Discounted T-Bill rate) + (Eligible Clearing Balance x MRR x Average Federal Funds Rate) ] x Days Carried/360 days = Earnings Credits where:

Eligiblecelearing Balance $=$
the sum of the institution's sactual daily clearing balance (uptot the maximum clearing balance band) divided by the days in the maintenance period (either ${ }_{1}{ }^{7}$ or ${ }_{1} \mathbf{1 4}_{4}$ days)
90.Percentt =
the eligible clearing, balance is multiplied by 90, Percent, to adjust for the reserve requirement imputed to the Reserve Banks (Referred to as the Marginal Reserve Ratioo on your statement)

## Earnings Credits

Eligible earnings credits are calculated based on the following formula every maintenance cycle:
[ (Eligible Clearing Balances $\times 90$ Percent x Average Discounted T-Bill rate) + (Eligible Clearing Balance $\times$ MRR x Average Federal Funds Rate) ] x Days Carried/360 days = Earnings Credits where:
Discounted T-Bill Rate $=\quad 90$ percent of the rolling, $\mathbf{1 3}_{3}$-week average of or "Earnings Credit Rate"

MRRR= the annualized coupon-equivalent yield of $f$ three-month Treasury bill in the secondary market:
the deppository institution's calculated marginal reserve rate. A depository institution that meets its reserve requirement entirely with vault cash is assigned a marginal reserve reguirement of zeroo in, this calculation
Average Federal Funds Rate $=$ weekly average Federal Funds Rate (FF)

## Earnings Credits

Marginal Required Reserve Rate (MRR) is defined as:

- Zero for Net Transaction accounts $\leq \$ 6.6$ million
- 3\% for Net Transaction accounts > \$6.6 million and $\leq \$ 45.4$ million
- 10\% for Net Transaction accounts > \$45.4 million

## Earnings Credits

Average federal funds rate :

- Two week average federal funds rate as published on the Federal Reserve Bank of New York website can be found at the following address:
http://www.federalreserve.gov/releases/h15/update/

## Earnings Credits

Example 1:
ABC Bank has met its clearing balance requirement of $\$ 20$ million. ABC is a weekly reporter with a calculated MRR of 3 percent. The current T-Bill rate is 0.96 percent and the Federal funds rate is 1.0 percent. Calculate the earnings credits.

## Earnings Credits

For the maintenance period in question, this bank will accrue earnings credits calculated as follows:

|  | ABC BANK |
| :---: | :---: |
|  |  |
| Days_Carried/360Days 7/3600 | Calculated Earnings, Credits $\$ 3,140,666$ |

## Earnings Credits

Example 1
ABC Bank will receive $\$ 3,140.66$ in earnings credits for the week ending Wednesday. The bank will receive earnings credits on 90 percent of its clearing balance at the discounted T-Bill rate and on three percent of its eligible clearing balance at the Fed Funds Rate.

## Earnings Credits

Example 2:
DEF Bank has met its clearing balance requirement of $\$ 20$ million. DEF is a weekly reporter with a calculated MRR of 3 percent. The current T-Bill rate is 1.25 and the Federal funds rate is 1.75 percent.

Calculate earnings credits.

## Calculation of Earnings Credits

For the maintenance period in question, this bank will accrue earnings credits calculated as follows:

## Earnings Credits

Example 2:
DEF Bank will receive \$4,141.66 in earnings credits for the week-ending Wednesday. The bank will receive earnings credits on 90 percent of its clearing balance at the discounted T-Bill rate and on three percent of its eligible clearing balance at the Fed Funds Rate.

## As-of Adjustments

Dorinda Chisholm

## Objectives

- What are as-of adjustments?
- What is the purpose of as-of adjustments?
- How does an as-of adjustment affect a depository institution's reserves/clearing position?
- Why are as-of adjustments issued?
- Who can issue as-of adjustments?

## Objectives

- What is the life cycle of an as-of adjustment?
- How are as-of adjustments applied?
- Can an as-of adjustment be unapplied or moved, after the fact?

## Definition

- An as-of adjustment is a "memorandum" item that is applied by a Reserve Bank to an institution's master account for a particular maintenance period
- It offsets the effect of a transaction or reporting error on an institution's position.

## Purpose

- The purpose of as-of adjustments are to correct errors that would otherwise result in a gain or loss to an institution and to correct for reporting errors.
- As-of adjustments are issued from the date the error occurred to the date prior to the correcting entry is made. (The number of days will usually not exceed 45.)

## As-of Adjustment Threshold

- Transaction-based errors of an initial amount of \$25,000 or greater and an aggregate amount of $\$ 250,000$ or more will be issued automatically.
- Adjustments that fall below the \$25,000/\$250,000 threshold will be issued on a case-by-case basis

## Transaction-based As-of Adjustments

- Applied to the period following the correction of the error.
- Never applied to the periods prior to the period in which it occurred.

## Affects of As-of Adjustments

- Debit as-of adjustments reduce the reserve and/or clearing position of a bank, therefore the institution will need to increase its balances in the maintenance period where the as-of adjustment is applied, to offset the negative effect.
- Credit as-of adjustments increase the reserve and/or clearing position so the institution may maintain a lower balance for the maintenance period where the as-of adjustment is applied.

## Reasons for Issuing As-of Adjustments

- Reserve Bank errors
- Depository institution errors
- Other miscellaneous causes

## Reserve Bank Errors

Basic principles -

- DI's should not gain or lose in their cumulative reserve and/or clearing balance positions as a result of accounting or administrative errors or delays in processing transactions by a Reserve Bank.
- Fed errors include:
- Failure to post a to a DI account
- Posting to a DI account prematurely
- Posting to the wrong account
- Posting an incorrect amount

## Depository Institution Errors

- FR 2900 Reporting errors
- DI - caused processing errors (routine)

## Miscellaneous Causes

- Unusual circumstances
- Reserve deficiencies
- Improper transfers

## Priced - Float As-of Adjustments

- Non-standard Holidays
- Voluntary Closings

## Priced - Float As-of Adjustments

- Week 1 - Float incurred
- Week 2 - As-of Adjustment prepared
- Week 3 - As-of Adjustment is applied on a Thursday only and always to the current maintenance period

## FR 2900 Caused As-Of Adjustments

- To correct for revisions to the Report of Transaction Accounts, Other Deposits and Vault Cash (FR 2900)
- As-of adjustments are issued to periods revised to eliminate a deficiency or excess created from revised data.

## FR 2900 Caused As-Of Adjustments

- An offsetting as-of adjustment will be applied to future maintenance periods only to allow an institution to make use of excess reserves held in the revised periods or to allow an institution to compensate for deficiencies that occurred in the revised periods.

## As-Of Adjustments

- As-of adjustments are issued by:
- FRB Check Department

## Life Cycle of As-Of Adjustments

## Problem Identification

- A depository institution identifies its account was incorrectly credited or debited and notifies the appropriate FRBNY operating area.
- The FRBNY operating area identifies that an error has occurred with an accounting transaction. The institution will be notified as soon as possible.

## Life Cycle of As-Of Adjustments

Creation of As-Of Adjustment

- The depository institution is notified that an as-of adjustment will be issued in order to neutralize the impact of the error.
- The requesting area forwards the request to Deposit Reports Division for approval and application.

## Life Cycle of As-Ofs

Application of As-Of Adjustment

- The Deposit Reports Division contacts the institution to discuss the application of the as-of adjustment if approved.
- The as-of adjustment is processed and applied to the institution's reserve and/or clearing position.

## Application of As-Of Adjustments

## ERRORS:

- FRB
- Depository Institution (routine adjustments)

## Application of As-Of Adjustments

- FRBNY usually applies as-of adjustments to the maintenance period that immediately follows the current maintenance period.
- The as-of adjustment may be applied to the maintenance period in which the error occurred only in extenuating circumstances with approval by the Board.

## Application of As-Of Adjustments

- When offsetting adjustments are applied to two depository institutions, both must be applied on the same day to the maintenance period that immediately follows the current maintenance period.

## Account Maintenance \& Position

## Objectives

- Account Structure
- How to Satisfy Reserve/Clearing Requirement
- Account Maintenance
- Position and Position Reports
- Tools for Managing Position

## Account Structure

- Master Account (Direct Account)
- Subaccount
- Correspondent/Pass-through Account
- Respondent
- Pass-Through Reserves

## Account Structure

## Master Account

- The Federal Reserve's account structure assigns each separately chartered (or licensed) institution a single master account at a designated Reserve Bank where all its activities with the Federal Reserve will be settled

## Account Structure

- Foreign-related institutions, U.S. branches and agencies of the same foreign parent bank, and the offices of an Edge or Agreement corporation will have a single master account for each group of offices located in the same state and same Federal Reserve District.

## Account Structure

What is a Master Account?

- It is a record of financial transactions that reflects the financial rights and obligations of an account holder and the Reserve Bank

## Account Structure

## How is a Master Account used?

- A Master Account allows a DI to settle and pay for services and/or maintain balances needed to meet its reserve requirement
- The Reserve Bank handling your master account will also administer all aspects of your account management which include reserve/clearing balance administration

## Account Structure

## How to establish a master/direct account

- Execute a Master Account Agreement form (included in Operating Circular 1, Account Relationships)
- Submit the Agreement to FRBNY's Accounting Operations Division at least 30 business days before the date you wish to open the account

## Account Structure

## Example

## Account Structure

## Subaccounts

- A subaccount is an informational record of a subset of transactions that affect the master account

## Account Structure

## How to establish a subaccount

- Must complete the "Subaccount Designation" form (included in Operating Circular 1, Account Relationships)
- Submit request to the Accounting Operations Division at least 15 business days before you wish the subaccount opened

## Account Structure

Example:

## Master Account

 Bank A, New York, NY

## Account Structure

## Correspondent (Pass-Through Account)

- A correspondent is an institution that has authorized a Reserve Bank to allow transactions to its master account on behalf of one or more respondents

## Account Structure

## Respondent

- A respondent is an institution that settles some or all of its non-Fedwire transactions in another institution's master account

## Account Structure

How to establish Pass-through Relationships

- Both the correspondent and respondent institutions must complete a Pass-Through Agreement form (included in Operating Circular 1, Account Relationships)
- Submit request to FRBNY's Deposit Reports Division at least 5 business days before the start of the maintenance period in which you wish to establish the relationship

## Account Structure

## Example:

- Bank USA (Correspondent Account) located in FRBNY District
- Bank SA (Pass-through respondent) located in FRB Atlanta District
- Bank SA must file its deposit reports directly with the Federal Reserve Bank of Atlanta, which is the District in which it is located.

## Account Structure

Pass-Through Reserves

- Any depository institution that is required to maintain reserve balances and is a nonmember depository institution, a U.S. branch or agency of a foreign bank, or an Edge or agreement corporation

## Satisfying Reserve Requirement

## Vault Cash

- Same computation period as deposit data
- Cannot be used to meet reserve requirements in a different maintenance period
- Cannot be used to offset clearing balance requirement

## Satisfying Reserve Requirement

## Account Balances

- Net total of all transactions (debits/credits) held in the master account at the end of day (EOD) at a Federal Reserve Bank

## Account Maintenance

- What is a maintenance period and when is settlement day?
- When is a maintenance period finalized?
- What is Position?

## Account Maintenance

Maintenance period

- Weekly reporters
- 14-Day period in which to maintain and settle required reserves and/or clearing balances
- Quarterly reporters
- 7-Day period in which to maintain and settle required reserves and/or clearing balances

## Account Maintenance

## Weekly Lagged Maintenance Cycle (14-day cycle)

## Computation Period

## Account Maintenance

## Quarterly Maintenance Cycle

(7-day cycle for 13 weeks)

## Account Maintenance

When is a maintenance period finalized?

- For both weekly and quarterly reporters, a maintenance period is finalized 28 days after the maintenance period has ended.

## Position

- Position is a measure of a depository institution's compliance with reserve and/or clearing balance requirements
- Position is initially determined by evaluating the difference between total maintained and total required.

## Position

- If negative, deficient in reserves and/or clearing balance requirement.
- If positive, excess in reserves and/or clearing balance requirement.

## Position

Factors that affect position are:

- Vault Cash
- Account Balances
- Overnight Overdrafts
- As-of Adjustments
- Clearing Balance Band
- Carryover
- Carryin

## Position

Overnight Overdrafts

- Negative end of day (EOD) balance in a Direct or Pass-Through account
- Direct impact (decrease) on total maintained balances

## Position

As-of Adjustments

- Directly impacts total maintained balances
- a debit as-of adjustment reduces total maintained balances for the maintenance period
- a credit as-of adjustment increases total maintained balances for the maintenance period

## Position

## Clearing Balance Band

- If maintained within the upper level, can generate extra earnings credits.
- If maintained within the lower level, can offset the effect of a deficiency.

## Position

## Carryover

- Carryover is an excess or deficiency amount that can be carried over to the next maintenance period.
- Cannot be carried over to subsequent periods.

## Position

## Carry-in

- The amount of carryover brought into the current maintenance period from the previous maintenance period.

## Position

How is carryover calculated?

- Gross RR plus RQCB (if any) equals total requirement;
- Multiply total requirement by $4 \%$, or \$50,000, which ever is greater;
- Subtract the RQCB band, if any (the RQCB band is computed at $2 \%$ of the RQCB or \$25,000 which ever is greater);
Equals Maximum Allowable Carryover

## Overview

## Reserve Deficiency vs. Clearing Deficiency

- Reserve Deficiency - Portion of reserve requirement that is not satisfied by vault cash and/or balances held directly at a Reserve Bank or indirectly in a passthrough account.
- Clearing Deficiency - Portion of the clearing balance that is not satisfied by balances held directly at a Reserve Bank.

## Reserve Deficiency

- Allowable Carryover - Not to exceed the greater of:
- 4\% of (Required Reserves + Required Clearing Balance) - Clearing Balance Band.
- \$50,000 - Clearing Balance Band
(Example)

$$
\begin{aligned}
4 \%(\$ 8,700,000+0)-0 & =\$ 348,000 \\
\$ 50,000-0 & =\$ 50,000

## Reserve Deficiency

Required Reserve Penalty

- Penalty = (Primary Rate + 1\%) * (\# Days in Maintenance Period) * (Deficiency) / (\# Days in Year)

Example
$(3.5 \% * 14 * \$ 200,000) / 365=\$ 269$

## Clearing Deficiency

## Example

## Comprehensive Reserve \& Clearing Deficiencies

Clearing Balance Penalty

- Part 1 : (Required Clearing Balance * 20\%) $(\$ 500,000 * 20 \%)=\$ 100,000$
- Part 2 : Clearing Balance Deficiency (Required Clearing Balance * 20\%) \$425,000-(\$500,000 * 20\% ) = \$ 325,000

## Comprehensive Reserve \& Clearing Deficiencies

- [(2\% of Part 1 of Clearing Deficiency) * \# Days in Maintenance Period / \# Days in Year] PLUS [(4\% of Part 2 of Clearing Deficiency) * \# Days in Maintenance Period / \# Days in Year] = Clearing Penalty
$(\$ 100,000 * 2 \%) * 14 / 365=\$ 77$
$(\$ 325,000 * 4 \%) * 14 / 365=499$
Total Clearing Penalty

## Comprehensive Reserve \& Clearing Deficiencies

- Reserve Deficiency
- Gross Deficiency - Required Clearing Balance Deficiency

$$
\$ 1,300,000-\$ 425,000=\$ 875,000
$$

## Comprehensive Reserve \& Clearing Deficiencies

- Required Reserve Penalty
- Penalty = (Primary Rate + 1\%) * (\# Days in Maintenance Period) * (Deficiency) / (\# Days in Year)

## Waivers

- "A" - Waiver

Penalty $\$ 25$ or less - May be waived and the institution may be required to explain the deficiency.

- "C" - Waiver

Penalty > \$25 and < or equal to 5\% of daily average requirement - May be waived once every 2 years.

## Summary

Key Points

- Vault cash cannot be used to satisfy Required Clearing Balance.
- Reserve balances are used to satisfy Required Reserves before Required Clearing Balance.
- A deficiency cannot be carried over to a subsequent deficient period.
- No Allowable Carryover for institutions with only a clearing balance.
- Certain penalties MAY be waived.

## Tips

Enter estimated balances and estimated as-of adjustments in dollars and cents.

For holidays, estimated balances entered by the user, should be identical to the balance for the previous day.

ReserveCalc automatically uses Friday's estimated balance for the following Saturday and Sunday.

## Balance Calculator

Let's assume you want to know what your Target Balance should be for the remaining days in the maintenance period, if you close with $\$ 250,000.00$ in your account on Monday night.

Enter your estimated balance, then click the Calculate button.
