# ACKNOWLEDGMENTS

Our hope is that this report contributes to policymakers' and service providers' understanding of the business conditions, credit needs, and borrowing experiences of nonemployer firms. A survey and report of this scope are made possible only through an extensive network of partners and collaborators, for which we are truly grateful. The Federal Reserve Banks of New York, Atlanta, Boston, Cleveland, Philadelphia, Richmond, and St. Louis thank the community partners in our Districts that distribute and promote the survey and share valuable insights with us about financing and service needs in their communities.<sup>1</sup> We also wish to thank the National Opinion Research Center (NORC) at the University of Chicago for assistance with the weighting methodology used to make the Small Business Credit Survey (SBCS) statistically representative.<sup>2</sup>

We also thank colleagues within the Federal Reserve System, especially the Community Affairs Officers, and representatives from the U.S. Department of the Treasury, U.S. Small Business Administration, The Aspen Institute, and Urban Institute for their feedback and support.

We particularly wish to thank the following people:

**Prabal Chakrabarti**, Senior Vice President and Community Affairs Officer, Federal Reserve Bank of Boston

**Nathan Dietz**, Senior Research Associate, Urban Institute

**Gwendy Donaker Brown**, Vice President, Policy and Evaluation, Opportunity Fund

**Donna Fabiani**, Executive Vice President, Knowledge Sharing, Opportunity Finance Network

**Joseph Firschein**, Deputy Associate Director and Community Affairs Officer, Federal Reserve Board of Governors

**Todd Greene**, Vice President and Community Affairs Officer, Federal Reserve Bank of Atlanta

**Tammy Halevy**, Senior Vice President, New Initiatives, Association for Enterprise Opportunity

**Kausar Hamdani**, Senior Vice President, Federal Reserve Bank of New York

**Gina Harman**, CEO, Accion USA

**Paul Kaboth**, Vice President and Community Affairs Officer, Federal Reserve Bank of Cleveland

**David Kaufmann**, Community Development Manager, Federal Reserve Board of Governors

**Jessica Milano**, Deputy Assistant Secretary, U.S. Department of the Treasury

**Joyce Klein**, Director, FIELD, The Aspen Institute

**Karen Leone de Nie**, Assistant Vice President, Federal Reserve Bank of Atlanta

**Tameka Montgomery**, Associate Administrator, U.S. Small Business Administration

**Paul Quintero**, CEO, AccionEast

**Theresa Singleton**, Vice President and Community Affairs Officer, Federal Reserve Bank of Philadelphia

**Yvonne Sparks**, Assistant Vice President and Community Affairs Officer, Federal Reserve Bank of St. Louis

**Jeffrey Stout**, Director, State Small Business Credit Initiative, U.S. Department of the Treasury

**Laura Temel**, Senior Advisor, U.S. Department of the Treasury

**Sandra Tormoen**, Assistant Vice President and Community Affairs Officer, Federal Reserve Bank of Richmond

**Charlene van Dijk**, Analyst, Federal Reserve Board of Governors

**Eric Weaver**, CEO, Opportunity Fund

**Marysol Weindorf**, Senior Community Affairs Analyst, Federal Reserve Board of Governors

<sup>1</sup> For a full list of community partners, please see the Appendix.

<sup>2</sup> For complete information about the survey methodology, please see the Methodology section.

# ACKNOWLEDGMENTS (CONTINUED)

This report is the result of the collaborative effort, input, and analysis of the following individuals.

## REPORT TEAM

**Claire Kramer Mills**, Federal Reserve Bank of New York

**Ellyn Terry**, Federal Reserve Bank of Atlanta

**Ann Marie Wiersch**, Federal Reserve Bank of Cleveland

## OUTREACH TEAM

**Bonnie Blankenship**, Federal Reserve Bank of Cleveland

**Jeanne Milliken Bonds**, Federal Reserve Bank of Richmond

**Nathaniel Borek**, Federal Reserve Bank of Philadelphia

**Brian Clarke**, Federal Reserve Bank of Boston

**Chelsea Cruz**, Federal Reserve Bank of New York

**Eileen Divringi**, Federal Reserve Bank of Philadelphia

**Shannon McKay**, Federal Reserve Bank of Richmond

**Drew Pack**, Federal Reserve Bank of St. Louis

**E. Kathleen Ranalli**, Federal Reserve Bank of Cleveland

**Javier Silva**, Federal Reserve Bank of New York

We thank all of the above for another successful collaboration. The 2016 SBCS is being fielded at the time of this release and has even broader coverage. The first report on those results is expected during the first half of 2017. The views expressed here are those of the authors and do not necessarily represent the views of the Federal Reserve System.

## **Claire Kramer Mills, PhD**

Assistant Vice President and Community Affairs Officer  
Federal Reserve Bank of New York

# EXECUTIVE SUMMARY

## 2015 SMALL BUSINESS CREDIT SURVEY: NONEMPLOYER FIRMS REPORT

Small nonemployer businesses—those with no employees other than the firms' owners—make up nearly 80% of all U.S. firms in number.<sup>3</sup> Yet, little is known about the performance or the financing needs and decisions of these 23 million businesses. The few sources that provide insight on small business credit conditions do not distinguish the experiences of nonemployers from small employer firms, which may differ significantly.

The 2015 Small Business Credit Survey (SBCS) helps to address these gaps. The survey collected 1,576 responses from nonemployer firms. These responses shed light on the experiences of these small business entities, including firm performance and financing outcomes.

The SBCS was first launched in 2014 through an effort that merged the regional surveys conducted by several Federal Reserve Banks.<sup>4</sup> The survey expanded its geographic coverage in 2015 to include 26 states.<sup>5</sup> The 2015 survey yielded 5,420 responses. The report on employer firms, which was released earlier this year, found the net share of firms reporting profitability, revenue growth and employment growth all increased from the 2014 survey. Moreover, half of applicants reported receiving all of the financing they applied for in 2015.

This report highlights the results for the non-employer respondents.<sup>6</sup> The survey results illustrate some of the unique characteristics and challenges that set nonemployer businesses apart from employer firms. While these firms, by definition, have no employees, nearly a third use contract workers. The survey results show that profitability is often a challenge for nonemployers, particularly the smaller firms. Finally, just 32% of firms

applied for financing in the prior year, and among applicants, the majority reported difficulties obtaining all or even some of the funding they sought.

### KEY FINDINGS FOR NONEMPLOYER FIRMS

Overall, the 2015 survey finds that for nonemployer firms:

**Owners rely on their businesses for income.** Two-thirds of nonemployer businesses provide the primary source of income for their owner(s). While owners of smaller revenue firms are generally less dependent on their business than owners of larger firms, about half of firms with less than \$25K in annual revenues provide the owner's primary source of income. The larger firms—those with annual revenues greater than \$100K—are most likely to serve as the owner's primary income source.

**Nonemployers are struggling to make a profit, and the owners bear much of the burden.** Only 35% of nonemployers indicated they're operating profitably. Their top two challenges in doing business are generating sales and managing cash flow. 44% of all nonemployers rely primarily on the personal funds of the owner to run the business. Among smaller and newer firms, nearly two-thirds are reliant on the owner's personal funds as a primary funding source for the business.

**Many firms are debt averse.** 68% of nonemployers did not apply for financing in the prior year. One-third of nonapplicants did not want to accrue debt and another quarter believed their application would not be approved. Collectively, applicants were less profitable than the nonapplicants.

**Applicants report issues with the lending process across a variety of lenders, but they are more satisfied with small banks.**

Applicants for loans and lines of credit turned mostly to large and small banks, but a noteworthy share (28%) sought credit at an online lender. When applicants were asked about their satisfaction with each of these sources, large banks and online lenders fared the worst; 62% of applicants to large banks and 55% of applicants to online lenders were dissatisfied with their experience overall, compared to 39% of applicants to small banks. The top complaint with large banks is a difficult application process. Online lenders received relatively low marks on repayment terms and interest rates, especially when compared to banks.

More detailed findings on nonemployer firms from the 2015 survey include:

#### Business operations and debt

- 32% of nonemployer firms report that they had relied on contractors in the prior 12 months. Among the largest nonemployer firms (\$100K+), nearly half said they utilized contractors.
- 40% reported they have outstanding debt; slightly more than half of nonemployer firms owe less than \$25K.

#### Financing experiences and outcomes

- 32% applied for financing in the prior 12 months, and 83% of these applicants sought a business loan or line of credit.
- Most applicants sought financing advice from one or more sources. Two-thirds turned to their banker or lender for guidance.

3 U.S. Census Bureau nonemployer statistics (May 2016 release).

4 See the Joint Small Business Credit Survey Report, 2014 (Federal Reserve Banks of New York, Atlanta, Cleveland, and Philadelphia). Note that the analysis of the 2014 data reported on the collective responses of nonemployer and employer firms; nonemployer findings were summarized separately in a Federal Reserve Bank of Atlanta discussion paper, *The Financing Experiences of Nonemployer Firms: Evidence from the 2014 Joint Small Business Credit Survey*, July 2015, by Stephanie Rosoff and Ellie Terry.

5 The 2015 Small Business Credit Survey was a collaborative effort of the Federal Reserve Banks of Atlanta, Boston, Cleveland, New York, Philadelphia, Richmond, and St. Louis.

6 *2015 Small Business Credit Survey: Report on Employer Firms* (March 2016).

# EXECUTIVE SUMMARY (CONTINUED)

- Overall, 59% of applicants were approved for at least some financing. Approval rates were highest among the largest firms; 73% of nonemployers with \$100K or more in annual revenue were approved for at least some of the financing they were seeking.
  - Smaller firms had a much more difficult time accessing funding. As a group, their approval rate was just 52%. The main factor determining where they applied was their perceived chance of being funded. The smallest firms (revenues less than \$25K) were nearly twice as likely to apply with an online lender as nonemployers with \$100K in annual revenue. Application rates to online lenders were 19%, and 37%, respectively.<sup>7</sup>
  - Among the most commonly used lenders, approval rates were highest at small banks, with 52% of applicants reporting they were approved for at least some funding. Online lenders had the second-highest approval rate, at 45%.
- Financing shortfalls and business impact**
- In total, 41% of applicants were not approved for the funding they sought. A low credit score and insufficient collateral were the top reasons firms were not approved for credit.
  - One-third of firms that had a financing shortfall reported they would delay plans for expansion. Others would use the owner's personal funds or would be unable to cover their business expenses.

## ABOUT THE SURVEY

The Small Business Credit Survey (SBCS) is a survey of firms, collecting information about business performance, financing needs and choices, and borrowing experiences of firms with fewer than 500 employees. Responses to the SBCS provide insight into the dynamics behind aggregate lending trends and shed light on noteworthy segments of small businesses. The results are weighted to reflect the full population of small businesses in the 26 states of coverage. The SBCS is not a random sample; therefore, results should be viewed as suggestive and analyzed with awareness of potential methodological biases.

<sup>7</sup> Similarly, employer firms that apply to online lenders tend to be smaller, younger, and less profitable than those applying to traditional sources. See *Click, Submit: New Insights on Online Lender Applicants from the Small Business Credit Survey*, <https://www.clevelandfed.org/en/newsroom-and-events/publications/special-reports/sr-20161012-click-submit.aspx>

# DEMOGRAPHICS

**AGE OF FIRM** (% of nonemployer firms) N=1576

**STATE** (% of nonemployer firms) N=1576

**INDUSTRY** (% of nonemployer firms) N=1576

<sup>8</sup> Includes agriculture, mining, utilities, transportation, warehousing, and wholesale trade.

# DEMOGRAPHICS (CONTINUED)

## REVENUE SIZE OF FIRM (% of nonemployer firms)

N=1355

## USE OF CONTRACT EMPLOYEES BY REVENUE SIZE OF FIRM (% of nonemployer firms)

Total N does not always equal the sum of sub-categories because firms are not required to answer all of the survey questions.

## REASON(S) FOR STARTING BUSINESS (% of nonemployer firms)

N=1407

The smallest firms are more likely to be home-based and less likely to be the owner's primary source of income.

## HOME-BASED BUSINESS BY REVENUE SIZE OF FIRM (% of nonemployer firms)

Total N does not always equal the sum of sub-categories because firms are not required to answer all of the survey questions.

## BUSINESS IS PRIMARY SOURCE OF INCOME BY REVENUE SIZE OF FIRM (% of nonemployer firms)

Total N does not always equal the sum of sub-categories because firms are not required to answer all of the survey questions.

## INCORPORATED STATUS OF FIRM (% of nonemployer firms)

N=1576

**41%** of nonemployer firms reported they're operating at a loss. Profitability challenges are most significant among the smallest firms.

**PROFITABILITY, End of 2014** N=1315  
(% of nonemployer firms)

**REVENUE CHANGE, Past 12 Months<sup>9</sup>** N=1439  
(% of nonemployer firms)

**PROFITABILITY BY REVENUE SIZE OF FIRM** (% of nonemployer firms)

While most nonemployer firms with less than \$25,000 in annual revenue operate at a loss, they also tend to be very young. **Three-quarters are less than 6 years old and 39% are new firms (0-1 years).**

<sup>9</sup> Approximately Q3 2014 through Q3 2015.

Generating enough revenue to keep the business running is top of mind for nonemployer firms.

**TOP BUSINESS CHALLENGE<sup>10</sup> BY TYPE OF FIRM, Past 12 Months<sup>11</sup>** (% of nonemployer firms)  
*In order of importance*

*Graph includes percentages for the most commonly cited business challenges and percentages thus do not sum to 100%. Consult questionnaire for complete set of question choices.*

<sup>10</sup> Select answer choices shown. See appendix for more detail.

<sup>11</sup> Approximately Q3 2014 through Q3 2015.

**40%** of nonemployer firms have outstanding debt, though few firms cite external financing as their primary funding source.

## PRIMARY FUNDING SOURCE ( % of nonemployer firms)

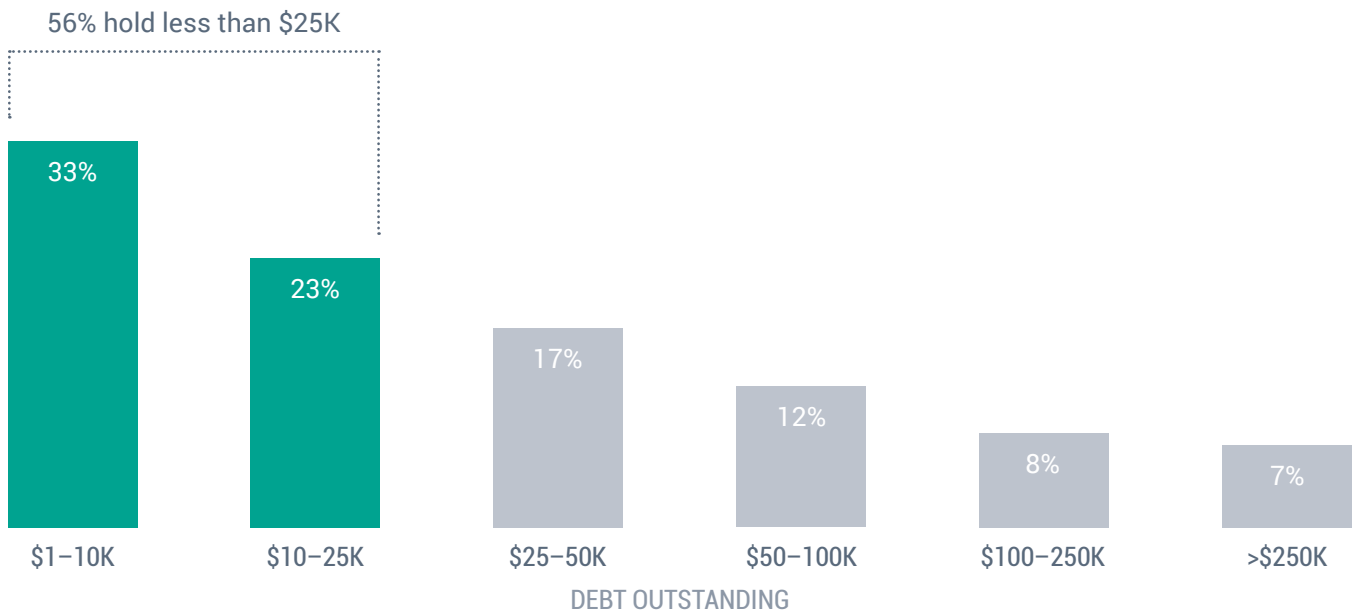

N=1501

*Due to rounding, percentages may sum to greater or less than 100.*

## AMOUNT OF DEBT, at time of survey ( % of nonemployer firms with debt)

N=565

A majority of very small and very young firms rely on the owners' personal funds, but that reliance declines as revenues increase or as a firm matures.

## PRIMARY FUNDING SOURCE BY REVENUE SIZE OF FIRM (% of nonemployer firms)

Due to rounding, percentages may sum to greater or less than 100.

## PRIMARY FUNDING SOURCE BY AGE OF FIRM (% of nonemployer firms)

**32%** of nonemployer firms **applied** for financing.

**REASON(S)<sup>12</sup> FOR APPLYING** (% of applicants)

N=454

**68%** of nonemployer firms **did not apply** for financing.

**PRIMARY REASON FOR NOT APPLYING** (% of nonapplicants)

N=1037

**PROFITABILITY<sup>14</sup> OF APPLICANTS AND NONAPPLICANTS** (% of applicants and nonapplicants)

<sup>12</sup> Respondents could select multiple answers.

<sup>13</sup> Discouraged firms are those that did not apply for financing because they believed they would be turned down.

<sup>14</sup> Profitability at the end of 2014.

## SOURCE(S)<sup>15</sup> OF FINANCING ADVICE (% of applicants)

N=456

## TOP FINANCING PRODUCTS<sup>15</sup> SOUGHT (% of applicants)

N=453

**83%** applied for a loan or line of credit.

**39%** applied for a credit card.

Demand for **credit cards** was highest among the smallest firms; 45% of applicants with less than \$25,000 in annual revenue applied for a credit card.

<sup>15</sup> Select answer choices shown. See appendix for more detail. Respondents could select multiple answers.

# APPLICANTS (CONTINUED)

## TOP TWO FACTORS<sup>16</sup> THAT INFLUENCE WHERE FIRMS APPLY BY REVENUE SIZE OF FIRM

	<\$25K N=170	\$25–100K N=101	>\$100K N=143
1	Perceived chance of being funded	Perceived chance of being funded	Cost
2	Flexibility of the credit product(s)	Cost	Existing relationship with lender

The smallest nonemployer firms turned to online lenders for funding almost as frequently as they turned to small banks.

## CREDIT SOURCES<sup>16</sup> APPLIED TO BY REVENUE SIZE OF FIRM (% of loan/line of credit applicants)

Total N does not always equal the sum of sub-categories because firms are not required to answer all of the survey questions.

<sup>16</sup> Select answer choices shown. See appendix for more detail. Respondents could select multiple answers.

<sup>17</sup> "Online lenders" are defined as nonbank alternative and marketplace lenders, including Lending Club, OnDeck, CAN Capital, and PayPal Working Capital.

**41%** of applicants were not approved for any of the funding they sought.

## TOTAL FINANCING APPROVED BY REVENUE SIZE OF FIRM, *Select Lenders* (% of applicants)<sup>18</sup>

Total N does not always equal the sum of sub-categories because firms are not required to answer all of the survey questions.

**71%** experienced a financing shortfall, meaning they received less financing than the amount they sought.

## PRIMARY IMPACT<sup>19</sup> OF FINANCING SHORTFALL (% of nonemployer firms with a financing shortfall)

N=183

Graph includes percentages for the most commonly cited business challenges and percentages thus do not sum to 100%. Consult questionnaire for complete set of question choices.

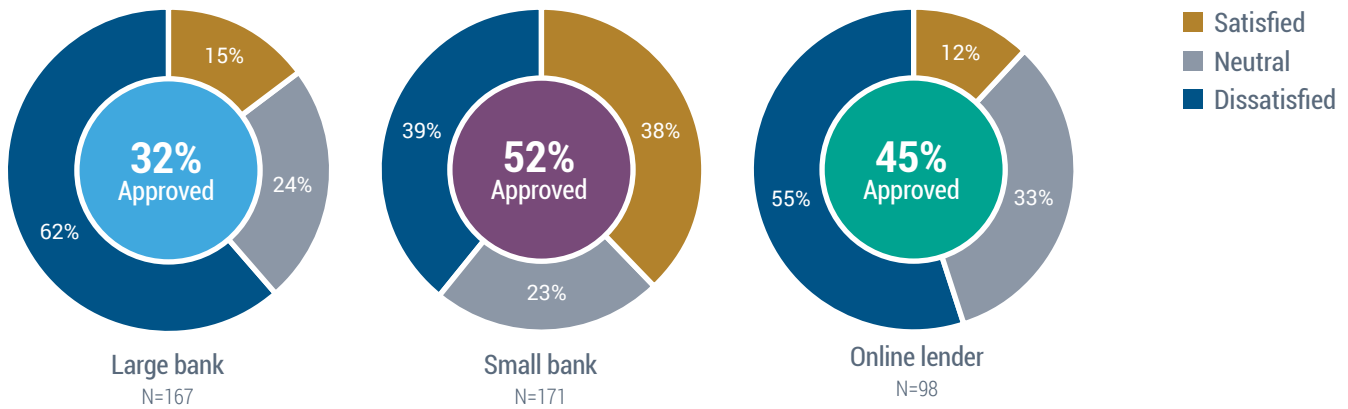

<sup>18</sup> Firms that were unsure how much they were approved for at the time of the survey are excluded from the chart.

<sup>19</sup> Select answer choices shown. See appendix for more detail.

# LENDER SATISFACTION

## APPROVAL RATES AND LENDER SATISFACTION, *Select Lenders*<sup>20</sup> (% of loan/loc applicants)

Due to rounding, percentages may sum to greater or less than 100.

Most online lender applicants were primarily dissatisfied with high interest rates and lack of transparency, while bank applicants cited concerns with the application process and the wait for a credit decision.

## REASON(S)<sup>21</sup> FOR DISSATISFACTION, *Select Lenders*<sup>20</sup> (% of nonemployer firms dissatisfied with lender)

<sup>20</sup> Select lenders shown due to low observation count.

<sup>21</sup> Respondents could select multiple answers.

<sup>22</sup> "Online lenders" are defined as nonbank alternative and marketplace lenders, including Lending Club, OnDeck, CAN Capital, and PayPal Working Capital.

# METHODOLOGY

## OVERVIEW

The Small Business Credit Survey (SBCS) is a convenience survey conducted by the Federal Reserve Banks of New York, Atlanta, Boston, Cleveland, Philadelphia, Richmond, and St. Louis. The SBCS reports information about the business performance, financing needs and choices, and borrowing experiences of businesses with fewer than 500 employees.

In total, 1,961 nonemployers responded to the survey, which was fielded between September 28, 2015 and November 27, 2015. Some 3,459 responses from employer firms were also captured, and are featured in *2015 Small Business Credit Survey Report on Employer Firms*. The results in both reports are weighted to reflect the full population of small businesses in the 26 states of coverage.<sup>23</sup>

## DATA COLLECTION

The SBCS is a convenience survey of establishments. Businesses are contacted by email through organizations that serve the small business community in participating Federal Reserve Districts. The survey is conducted online and typically takes 6 to 12 minutes to complete, depending upon the intensity of a firm's search for financing. Likewise, the number of responses for each question varies according to how many firms received and completed a particular question.

## WEIGHTING

The SBCS is not a random sample of small firms, and therefore suffers from a greater set of biases than surveys that contact firms randomly. We attempt to correct for biases resulting from the convenience sample by weighting the results by industry and age so that the distribution of firms in the survey match the distribution of the nonemployer

firm population in the coverage area. Specifically, we use a statistical weighting method known as raking to upweight responses of underrepresented firms and downweight overrepresented firms in the survey. The resulting sum of the individual firm weights roughly equals the number of nonemployer firms in the 26 states of coverage. Weighting also ensures that firms are distributed across three age categories and eight industries in a way that mirrors that of the population.<sup>24</sup> Age and industry groupings are determined based on noteworthy differences in financing requests and success across groups, while balancing the need for sufficient observation counts in each category. Still, caution should be taken when interpreting the results. The data are not a statistical representation of small businesses. The data used for weighting come from the 2012 Survey of Business Owners collected by the US Census Bureau.

<sup>23</sup> The employer report is weighted along the dimensions of employer size, age, and industry, using data from County Business Patterns and Business Dynamics Statistics, both collected by the U.S. Census Bureau. The nonemployer report is weighted by firm age and industry using data from the Survey of Business Owners.

<sup>24</sup> See Demographics section for a complete list of states covered and age and industry stratification.
