Consumer Spending .................................................................................................................................. 48
Full Report Highlights

- **INFLATION**
  Inflation gaps are smaller than they were during the 2021-22 inflationary episode, but minority households, high-income households, college-educated households and middle-age households continue to experience above-average inflation in early 2024.

- **EARNINGS**
  Real earnings gaps across racial and ethnic groups, educational groups, and men and women have remained in their long-run ranges, though the Black earnings gap is slowly shrinking over time.

- **EMPLOYMENT**
  The Black employment gap, specifically the gap for Black women, has been growing in the region despite shrinking in the nation.

- **CONSUMER SPENDING**
  The region has had little growth in spending since its recovery from the pandemic when compared to the rest of the nation.
Takeaways | Inflation

- Inflation over the past year has been higher in the rest of the nation than the region.

- Black, Hispanic, and AAPI households in the region experienced inflation that is 0.16-0.56 percentage point higher than the regional average in February 2024, while white households experienced inflation that is below this average. These gaps are explained by the lower budget share of housing for white households than for households in other racial and ethnic groups.

- Lower-income households in the region are experiencing somewhat lower inflation than higher-income households are, in part because the price of food, which forms a relatively larger part of the budget of lower-income households, has been growing slower than inflation overall.

- College-educated households in the region also experienced above average inflation because of their smaller exposure to housing and transportation inflation, both of which are below regional headline inflation.

- Middle-aged households in the region have above average inflation because of their greater budget share of housing.

- These gaps follow much larger gaps during the 2021-22 inflationary episode, when groups with high exposure to transportation inflation (Hispanic, middle and high-income, non-college, and middle-age households) had inflation well above the regional average. These gaps have now subsided.
Data & Methods

- Data on inflation by demographic groups are not produced by the Bureau of Labor Statistics.

- To calculate demographic inflation, we exploit the fact that the Consumer Expenditure Survey (CEX) can be used to compute spending shares of various consumption categories (for example, cereal, rent, and used cars) by demographic group (for example, Black, Hispanic, some college, and aged 45-54).

- We define the region in the CEX to be the union of the New York-New Jersey metro area (excluding counties in Pennsylvania) with all other counties in New York state.

- To compute the contribution of a consumption category in a particular city to demographic inflation for a specific group, we take that group’s spending share on that category in that city (from the CEX) in the previous year and multiply it by the twelve-month inflation for that consumption category in that city (from the Consumer Price Index).

- We then add up all the contributions to get an inflation index for the demographic group.

- Our method is similar to the previous literature, for example, Hobijn and Lagakos (2005), McGranahan and Paulson (2006), and Jaravel (2019). We are the first to exploit price variation across cities whereas the above-mentioned studies assume people in different demographic groups and cities face the same prices.
Inflation by Sector

12-Month CPI Inflation (%), by Sector

Sources: CPI via Haver Analytics; authors’ calculations.
Note: Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Demographic Inflation by Race/Ethnicity

Sources: BLS Consumer Expenditure Survey microdata; BLS Consumer Price Indexes.
Notes: Expenditure shares use 2021 CEX microdata. Shaded region indicates the COVID-19 recession.
Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Demographic Inflation by Income

Sources: BLS Consumer Expenditure Survey microdata; BLS Consumer Price Indexes.
Notes: Expenditure shares use 2021 CEX microdata. Shaded region indicates the COVID-19 recession.
Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Demographic Inflation by Education

Sources: BLS Consumer Expenditure Survey microdata; BLS Consumer Price Indexes.
Notes: Expenditure shares use 2021 CEX microdata. Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Demographic Inflation by Age

Sources: BLS Consumer Expenditure Survey microdata; BLS Consumer Price Indexes.
Notes: Expenditure shares use 2021 CEX microdata. Shaded region indicates the COVID-19 recession.
Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Takeaways | Earnings

- Similar to the rest of the nation, real earnings in the region peaked during the pandemic recession and have fallen since and disparities (both nominal and real) are largest across education categories, with smaller but still substantial gaps across racial and ethnic categories, gender, and age.

- The Black and Hispanic earnings gaps remain in the 20%-30% range, although there are indications that they have declined relative to the pre-pandemic period. Both gaps have risen over the last quarter, but the Black earnings gap remains below its pre-pandemic levels.

- The gender gap remains in the 15%-20% range in which it has been for most of the period since August 2019. The gender gap in the region has become somewhat lower than in the nation, reached its lowest in September 2023 but rose from post-pandemic lows over the last quarter.

- The college premium remains in the 80%-100% range in which it has been since August 2019. The college premium in the region tends to be somewhat higher than in the nation as a whole.
Data & Methods

- We compute real earnings by deflating nominal earnings for each demographic using our estimates of demographic-specific inflation.

- Gaps are defined as the percentage difference in earnings between a majority group and a minority group in the labor market.

- The gender gap is defined as the percentage difference between male and female earnings.

- The racial gaps are defined as the percentage differences between earnings of white non-Hispanic workers and earnings of workers of the race or ethnicity in question.

- The college premium is defined as the percentage difference between earnings of college graduates and earnings of workers who did not graduate from college.

- We define the region in the CPS to be the union of the New York-New Jersey metro area (excluding counties in Pennsylvania) with all other counties in New York state.
Real/Nominal Earnings by Race/Ethnicity

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Real earnings uses corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. The race gap is defined here as the percent less in real earnings that the average Black/Hispanic/AAPI American earns on average compared to white Americans. For instance, a gap of 20% implies that the average Black/Hispanic/AAPI American earns 80% of the average white American. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Individual weekly earnings from April 2023 onward are top coded to $2884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
Real/Nominal Earnings by Education

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Real earnings uses corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. College premium is defined here as the percent more that college graduates earn (weekly) on average compared to non-graduates. For instance, a gap of 80% implies that the average graduate earns 80% more than the average non-graduate. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Individual weekly earnings from April 2023 onward are top coded to $2884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
Real/Nominal Earnings by Age

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.
Notes: Real earnings use corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Individual weekly earnings from April 2023 onward are top coded to $2,884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
Real/Nominal Earnings by Gender

Weekly gender earnings gap (percent)

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.

Notes: Real earnings uses corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. The gender gap is defined here as the percent less that women earn on average compared to men. For instance, a gap of 20% implies that the average woman earns 80% of the average man. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Equitable Growth Indicators | Earnings | Regional

Individual weekly earnings from April 2023 onward are top coded to $2,884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
Real/Nominal Earnings by Race x Gender (Women)

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.

Notes: Real earnings uses corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. The earnings gap is defined here as the percent less that a woman of each racial/ethnic group earns on average compared to white men. For instance, a gap of 40% implies that the average Black/Hispanic/AAPI/white woman earns 60% of the average white man. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Individual weekly earnings from April 2023 onward are top coded to $2,884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
Real/Nominal Earnings by Race x Gender (Men)

Real weekly earnings gap relative to white men (percent)

Notes: Real earnings uses corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. The earnings gap is defined here as the percent less that a man of each racial/ethnic group earns on average compared to white men. For instance, a gap of 20% implies that the average Black/Hispanic/AAPI man earns 80% of the average white man. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Individual weekly earnings from April 2023 onward are top coded to $2,884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
EMPLOYMENT:
EMPLOYMENT-TO-
POPULATION RATIO

UPDATED THROUGH February 2024 | REGIONAL

Raji Chakrabarti, Kasey Chatterji-Len, and Maxim Pinkovskiy
Takeaways | EPOP

- The employment-to-population ratio (EPOP) in the region is following many of the trends observed in the nation. In particular, EPOP has recovered to its pre-pandemic levels (comparing with October 2019) both in the aggregate, for men and women, and for all racial and ethnic groups. Employment rates peaked around July 2023 and have been moderately declining since.

- As in the nation, employment gaps are largest for Black workers, followed by Hispanic and AAPI workers. Except for the Black employment gap, these gaps have declined to pre-pandemic levels. The Black employment gap remains above the pre-pandemic level.

- The Black employment gap in the region remains large (10 percentage points) and has been growing since the spring of 2023. The narrowing of the Black employment gap overall and specifically for Black women in the nation over this quarter has not been observed in the region.

- The college and gender employment gaps have also been declining steadily, as in the national data.

- The rural employment gap has been rising in 2023.

- We define the region in the CPS for all labor market charts to be the union of the New York-New Jersey metro area (excluding counties in Pennsylvania) with all other counties in New York state.
EPOP by Race/Ethnicity

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Employment gap defined relative to white employment.
EPOP by Education

Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Rural employment gap defined as employment of urban workers relative to rural workers.
Takeaways | Unemployment Rate

- We define unemployment rate as the fraction of unemployed in the labor force. The overall unemployment rate in the region peaked at more than 14% during the pandemic, which was higher than the national peak at 11%. Both have returned to pre-pandemic levels.

- In both the region and the nation, unemployment rate gaps increased during the pandemic, but are now close to pre-pandemic levels.

- The Black unemployment rate in the region has declined during this quarter by nearly a percentage point but remains above the national Black unemployment rate.

- Unemployment rates in the region in October 2023 are highest for workers with less than a high school diploma (6.66%), followed by Black workers (5.32%), followed by workers aged over 64 (5.08%)

- The college unemployment gap peaked at 11% during the pandemic in the region (compared to 7% in the nation) but has returned to a similar level to the nationwide gap.
Unemployment Rate by Race/Ethnicity

- Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
- Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Notes: Overall line uses prime-age (25-54) sample. Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Unemployment Rate by Urban Status

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Urban unemployment gap defined as unemployment of urban workers relative to rural workers.
Takeaways | Labor Force Participation

- The dynamics and heterogeneity in labor force participation (LFP) in the region mirror those of EPOP.
- LFP rates for minorities in the region are now above their pre-pandemic levels (comparing with February 2020), with one exception. The LFP rate of Black workers is falling and is currently below its February 2020 levels.
- Black, Hispanic, and Asian workers have LFPs below the region average, with the LFP of Black workers (and especially Black women workers) having fallen substantially since August 2023.
- The college LFP gap and the gender LFP gap in the region have both risen over the course of the last quarter, but the gender LFP gap (11.96%) is still below its pre-pandemic levels.
- The rural-urban LFP gap is stabilizing in the 4-5% range.
Labor Force Participation by Race/Ethnicity

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

LFP gap defined relative to white LFP.
Labor Force Participation by Education

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

College LFP gap defined as LFP of college graduates relative to non-graduates.
**Labor Force Participation by Gender**

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Gender LFP gap defined as LFP of men relative to women.
Labor Force Participation by Race x Gender

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Labor Force Participation Gaps by Race x Gender

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Labor Force Participation by Age

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors' calculations, three-month moving averages.

Notes: Overall line uses prime-age (25-54) sample. Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.
Labor Force Participation by Urban Status

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors' calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Rural LFP gap defined as LFP of urban workers relative to rural workers.
Takeaways | Consumer Spending

- Consumer spending growth in the region has been largely stagnant relative to the pre-pandemic period. This is in contrast to the nation as a whole, which has seen real retail spending rise relative to pre-pandemic levels. The region also experienced a larger drop in consumption during the height of the pandemic in the spring of 2020.

- Similar to the rest of the nation, in the region, lower income, less educated, and younger individuals experienced a significantly faster growth rate, or a slower decline in spending since the pandemic. There are some signs, however, that spending among the young and less educated is weakening, as in the nation.

- In both the region and in the nation, consumer spending recovery gaps are largest among age groups and smallest among income groups, with education gaps in the middle.
Data & Methods

- We leverage a permissioned panel of around 40 million U.S. households’ debit and credit card spending from Commerce Signals, a TransUnion company.

- Commerce Signals data correlate well with U.S. Census Bureau data in measuring aggregate trends in retail, restaurants, and gas station spending, but is released at high frequency (weekly).

- Data are seasonally adjusted by first considering a week in the year and dividing over the 52-week moving average centered at that week. The mean of these ratios across years is used as that week's denominator for seasonal adjustment.

- Real consumer spending trends use the demographic inflation price indexes from the Inflation section when possible. For county demographic spending (besides urban vs. rural), regional price indexes are used.

- We define the region to be all counties in New York State, Northern New Jersey, and Fairfield County, Connecticut. This is equivalent to the Second District of the Federal Reserve excluding Puerto Rico and the US Virgin Islands.
Retail Spending by Income

Nominal retail spending, percent change

Real retail spending, percent change

Source: Commerce Signals – Three-week moving averages.
Notes: Real spending uses corresponding demographic prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Retail Spending by Education

Nominal retail spending, percent change

Real retail spending, percent change

Notes: Real spending uses corresponding demographic prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Retail Spending by Age

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Source: Commerce Signals – Three-week moving averages.
Notes: Real spending uses corresponding demographic prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Gas Station Spending by Education

Source: Commerce Signals – Three-week moving averages.
Notes: Real spending uses corresponding demographic prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Gas Station Spending by Age

Nominal gas station spending, percent change

Real gas station spending, percent change

Source: Commerce Signals – Three-week moving averages.
Notes: Real spending uses corresponding demographic prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Restaurant Spending by Income

Nominal restaurant spending, percent change

Real restaurant spending, percent change

Source: Commerce Signals – Three-week moving averages.
Notes: Real spending uses corresponding demographic prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Restaurant Spending by Education

Source: Commerce Signals – Three-week moving averages.
Notes: Real spending uses corresponding demographic prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Restaurant Spending by Age

Nominal spending ranges from January 1, 2020, to March 9, 2024. Real spending ranges from January 1, 2020, to February 24, 2024.
Nominal retail spending ranges from January 1, 2020 to March 16, 2024. Real retail spending ranges from January 1, 2020 to February 24, 2024.

Retail Spending by County Household Income

Source: Commerce Signals – Three-week moving averages.
Notes: Low-income counties are defined as those with household incomes below the 25th percentile of national household income. Real spending uses corresponding regional prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.
Nominal spending ranges from January 1, 2020 to March 16, 2024. Real spending ranges from January 1, 2020 to February 24, 2024.

Retail Spending by Low to Moderate Income (LMI) Status

Nominal retail spending, percent change

Real retail spending, percent change

Source: Commerce Signals – Three-week moving averages.
Notes: Low-to-moderate income (LMI) counties are defined as those where the majority of households earn below 80% of the metro area median. Real spending uses corresponding urban/rural prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.
Nominal spending ranges from January 1, 2020 to March 16, 2024. Real spending ranges from January 1, 2020 to February 24, 2024.

Retail Spending by County Demographics

Source: Commerce Signals – Three-week moving averages.
Notes: Majority Black/Hispanic counties are defined as those where greater than 50% of the county’s population is Black or Hispanic. Real spending uses corresponding regional prices, indexed to January 2020. Shaded region indicates the COVID-19 recession. Includes all counties in the Federal Reserve Second District, excluding Puerto Rico and the Virgin Islands.
