Takeaways | EPOP

- Employment gaps for Black, Hispanic and AAPI workers have fallen this quarter, with the Black employment gap relative to the national average attaining its lowest value since the pre-pandemic period.
- Employment rates for prime-age Black women (76.68%) are nearly the same as those for prime-age white women (77.63%)
- The employment gap for Black men (relative to white men) is close to its post-pandemic lows but is still sizeable (7.26 percentage points)
- The gender and college employment gaps have remained roughly stable this quarter.
- The rural-urban employment gap declined this quarter to 3.16 percentage points and appears to be stable in the 3-4 percentage point range.
- Employment for veterans has risen this quarter and is now three percentage points below that of comparable non-veterans*, although disability status and education explain much of this gap.

*Comparable nonveterans are male high school graduates reweighted by age, race and birthplace to match veterans.
Full Report Highlights

- **INFLATION**
  Inflation trends continued to be very similar to the last quarter of 2023, with inflation inequality being low and AAPI households, households from the lowest-income 40% and young households experiencing relatively higher inflation.

- **EARNINGS**
  The Black earnings gap has marginally increased, nevertheless remaining well below pre-pandemic levels.

- **EMPLOYMENT**
  Black employment and labor force participation gaps declined to their lowest levels since the pandemic, driven by Black women.

- **CONSUMER SPENDING**
  Consumer spending rose overall in early 2024, with the increase shared by all groups except for the young (25-34).

- **WEALTH**
  Growth in wealth after 2019 was faster for some groups with little wealth relative to population, but did not meaningfully reduce stark wealth inequalities across demographic groups.
Data & Methods

- We compute employment using weighted estimates from the Current Population Survey (CPS).
- Comparable nonveterans are male high school graduates reweighted by age, race and birthplace to match veterans.
- Gaps are defined as the percentage point difference in employment, labor force participation, and unemployment rate between different groups.
- The gender gap is defined as the percentage point difference in the employment statistic of women relative to men.
- The racial gaps are similarly defined as the difference between the employment of workers in the given racial or ethnic group relative to white workers.
- The college gap is calculated relative to non-college educated workers.
- The rural gap is defined relative to rural workers.
EPOP by Race/Ethnicity

EPOP (percent)

Employment gap (percentage points)

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Employment gap defined relative to white employment.

EPOP by Education

EPOP (percent)

College employment gap (percentage points)

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

College employment gap defined as employment of college graduates relative to non-graduates.
EPOP by Gender

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Gender employment gap defined as employment of men relative to women.
Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages. 
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.
EPOP Gaps by Race x Gender

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.
EPOP by Age

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations; three-month moving averages.

Notes: Overall line uses prime-age (25-54) sample. Shaded region indicates the COVID-19 recession.
EPOP by Urban Status

**Sources:** U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

**Notes:** Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Rural employment gap defined as employment of urban workers relative to rural workers.
EPOP by Veteran Status

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Restricted to men, 25-55, with at least a high school diploma. Shaded region indicates the COVID-19 recession.
Takeaways | Unemployment Rate

- Overall unemployment rose to 3.4% by February 2024.

- Demographic gaps in unemployment are close to their pre-pandemic levels, although the unemployment gap for Hispanic workers is rising modestly. Black workers have an unemployment rate that is 2 percentage points higher than the national average, while Hispanic workers have an unemployment rate that is 1.34 percentage points higher than the national average.

- The college unemployment rate gap rose to 2.24 points in the last quarter, down from a peak of over seven percentage points during the summer of 2020, and close to its pre-pandemic level.

- The gender unemployment gap has turned negative, as did the veterans unemployment gap (women and veterans have lower unemployment than men and comparable nonveterans*, respectively).

*Comparable nonveterans are male high school graduates reweighted by age, race and birthplace to match veterans.
Unemployment Rate by Race/Ethnicity

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Unemployment gap defined relative to white unemployment.
Unemployment Rate by Education

Unemployment rate (percent)

College unemployment rate gap (percentage points)

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

College unemployment gap defined as unemployment of non-college graduates relative to graduates.
Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Gender employment gap defined as unemployment of women relative to men.
Unemployment Rate by Race x Gender

Unemployment rate (percent), women

Unemployment rate (percent), men

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.
Unemployment Rate Gaps by Race x Gender

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.
Unemployment Rate by Age

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors' calculations, three-month moving averages.
Notes: Overall line uses prime-age (25-54) sample. Shaded region indicates the COVID-19 recession.
Unemployment Rate by Urban Status

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Urban unemployment gap defined as unemployment of urban workers relative to rural workers.
Unemployment Rate by Veteran Status

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to men, 25-55, with at least a high school diploma. Shaded region indicates the COVID-19 recession.
Takeaways | Labor Force Participation

- Overall LFP has flatlined at slightly above its pre-pandemic level (83.4%).
- The LFP gap for Black workers has fallen to 2.5 percentage points, well below its pre-pandemic and pandemic-period levels. The LFP gap for Hispanic workers is close to its pre-pandemic level.
- Similar to employment trends, the LFP rate for Black women has risen substantially since the last quarter of 2023 and now exceeds the LFP rate for white women.
- The college and gender LFP gap have remained essentially flat since the last quarter of 2023, while the rural-urban LFP gap has fallen.
- The LFP rate of veterans has risen since the last quarter of 2023.
Labor Force Participation by Race/Ethnicity

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

LFP gap defined relative to white LFP.
Labor Force Participation by Education

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.
Labor Force Participation by Gender

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Gender LFP gap defined as LFP of men relative to women.
Labor Force Participation by Race x Gender

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.
Labor Force Participation Gaps by Race x Gender

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.
Labor Force Participation by Age

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Overall line uses prime-age (25-54) sample. Shaded region indicates the COVID-19 recession.
Labor Force Participation by Urban Status

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Restricted to prime-age individuals (25-54). Shaded region indicates the COVID-19 recession.

Rural LFP gap defined as LFP of urban workers relative to rural workers.
Labor Force Participation by Veteran Status

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Restricted to men, 25-55, with at least a high school diploma. Shaded region indicates the COVID-19 recession.
