WEALTH INEQUALITY

UPDATED THROUGH APRIL 2024 | NATIONAL

Raji Chakrabarti, Natalia Emanuel, and Ben Lahey
Wealth is distributed disproportionately across demographic groups. People with the most wealth tend to have high incomes, be college graduates, be over 55 years old, and/or be white. We define wealth as a group’s assets minus its liabilities.

Growth in per household wealth since the pandemic has been especially pronounced for people under 40 years old, people in the bottom half of the wealth distribution, and the 20th to 60th percentiles of income earners. Per household wealth growth since the pandemic has been similar across racial and ethnic groups and across education groups.

The sources of wealth growth across those groups with relatively rapid growth are not consistent. Under-40-year-olds were propelled by considerable growth in financial assets; the 20th-60th percentile income group by steady growth in both financial and real estate assets; and the bottom 50% wealth group by strong growth in financial assets paired with limited growth in total liabilities. Groups like the top income and wealth groups that saw rapid financial asset growth and lesser total wealth growth were generally held back by low real estate growth.

Demographic wealth inequalities remain similar in 2023 as they were in 2019, despite comparatively rapid wealth growth among some of the least wealthy demographic groups.
Full Report Highlights

- **INFLATION**
  Inflation trends continued to be very similar to the last quarter of 2023, with inflation inequality being low and AAPI households, households from the lowest-income 40% and young households experiencing relatively higher inflation.

- **EARNINGS**
  The Black earnings gap has marginally increased, nevertheless remaining well below pre-pandemic levels.

- **EMPLOYMENT**
  Black employment and labor force participation gaps declined to their lowest levels since the pandemic, driven by Black women.

- **CONSUMER SPENDING**
  Consumer spending rose overall in early 2024, with the increase shared by all groups except for the young (25-34).

- **WEALTH**
  Growth in wealth after 2019 was faster for some groups with little wealth relative to population, but did not meaningfully reduce stark wealth inequalities across demographic groups.
The Board of Governors of the Federal Reserve System publish the Distributional Financial Accounts (DFA) as a unique source of data on wealth holdings across demographic and economic groups. The DFA combine sectoral balance sheet data from the Financial Accounts with individual-level holdings from the Survey of Consumer Finances as described in Batty et al. (2019). We plot nominal, per household holdings by group in each wealth category in line charts and each group’s share of total households and nominal wealth types in bar graphs. Where possible we also present real holdings by deflating each group’s holdings using demographic price indices created by the authors.
WEALTH INEQUALITY
BY RACE & ETHNICITY
Population and Ownership Shares by Race & Ethnicity

Sources: Distributional Financial Accounts via Federal Reserve, Consumer Price Index via Haver Analytics, and authors' calculations. "Net worth" is total assets less total liabilities. Note: Asian, American Indian, Pacific Islander, and other groups are excluded for sample size concerns.
Net Worth per Household by Racial and Ethnic Group

Sources: Distributional Financial Accounts via Federal Reserve, Consumer Price Index via Haver Analytics, and authors’ calculations. "Net worth" is total assets less total liabilities. Note: Asian, American Indian, Pacific Islander, and other groups are excluded for sample size concerns. Shaded region indicates the COVID-19 recession.
Total Assets per Household by Racial and Ethnic Group
