EARNINGS

UPDATED THROUGH MAY 2024 | REGIONAL

Raji Chakrabarti, Kasey Chatterji-Len, and Maxim Pinkovskiy
Takeaways | Earnings

- Similar to the rest of the nation, real earnings in the region peaked during the pandemic recession and have fallen since, and disparities (both nominal and real) are largest across education categories, with smaller but still substantial gaps across racial and ethnic categories, gender, and age.

- The average earnings for the region are higher than in the rest of the country.

- The Black and Hispanic earnings gaps remain in the 20%-30% range, although there are indications that they have declined relative to the pre-pandemic period. In particular, the Black-white earnings gap stands at 24.06 percentage points in May 2024, compared to 28.28 percentage points in May 2019.

- The gender gap has declined to 13.3 percentage points in May 2024 relative to 20.8 percentage points in May 2019, consistent with it declining in the region as well as in the nation.

- The college premium remains in the 80%-100% range in which it has been since January 2019. The college premium in the region tends to be somewhat higher than in the nation as a whole.
Full Report Highlights

- **INFLATION**
  Inflation rates have converged across groups with different incomes and ages, as well as, to a lesser extent, education levels. This is in part because of rising inflation in a variety of important consumption categories in the region.

- **EARNINGS**
  Average real earnings are higher in the region compared to the national average. Real earnings gaps across racial and ethnic groups, educational groups, and between men and women have remained in their long-run ranges, though the Black earnings gap and the gender earnings gap are slowly shrinking over time.

- **EMPLOYMENT**
  Labor market gaps have declined in the region at rates similar to those of the nation as a whole. In particular, the gender gap in the region has declined faster and fallen lower than the national gender gap. On the other hand, employment and LFP gaps for Black workers relative to white workers tend to be wider in the region than in the nation, though for unemployment gaps the reverse is true.
Data & Methods

- We compute real earnings by deflating nominal earnings for each demographic using our estimates of demographic-specific inflation.

- Gaps are defined as the percentage difference in earnings between a majority group and a minority group in the labor market.

- The gender gap is defined as the percentage difference between male and female earnings.

- The racial gaps are defined as the percentage differences between earnings of white non-Hispanic workers and earnings of workers of the race or ethnicity in question.

- The college premium is defined as the percentage difference between earnings of college graduates and earnings of workers who did not graduate from college.

- We define the region in the CPS to be the union of the New York-New Jersey metro area (excluding counties in Pennsylvania) with all other counties in New York state.
Real/Nominal Earnings by Race/Ethnicity

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.

Notes: Real earnings uses corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. The race gap is defined here as the percent less in real earnings that the average Black/Hispanic/AAPI American earns on average compared to white Americans. For instance, a gap of 20% implies that the average Black/Hispanic/AAPI American earns 80% of the average white American. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Individual weekly earnings from April 2023 onward are top coded to $2884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
Real/Nominal Earnings by Education

Sources: U.S. Census Bureau/BLS - Current Population Survey microdata; authors’ calculations, three-month moving averages.
Notes: Real earnings uses corresponding demographic prices, indexed to June 2019. Shaded region indicates the COVID-19 recession. College premium is defined here as the percent more that college graduates earn (weekly) on average compared to non-graduates. For instance, a gap of 80% implies that the average graduate earns 80% more than the average non-graduate. Includes all counties belonging to the Federal Reserve Second District excluding Puerto Rico, the US Virgin Islands, Warren County, NJ, and Fairfield County, CT, and additionally including Ocean County, NJ.

Individual weekly earnings from April 2023 onward are top coded to $2884.61, in accordance with pre-April 2023 CPS data conventions for continuity.
