The following questionnaire includes items which correspond to variables that are currently released in the SCE Household Finance Survey microdata. Questions that were included in earlier waves of the survey, but are no longer fielded, do not appear in this questionnaire or in the microdata. All items that are currently fielded are included below and in the microdata. Questions with multiple response options limit respondents to choosing one option unless otherwise noted.

Section A Intro

We are interested in learning more about your current financial situation, and your outlook for the future. This survey takes about 20 to 30 minutes. You will receive $\text{CAMNT}$ for completing the survey.

Most of the questions in this survey have no right or wrong answers - we are interested in your views and opinions. Your responses are confidential, and it helps us a great deal if you respond as carefully as possible. If you should come to any question that you can't or don't want to answer, just click on 'NEXT' and wait for the next question to appear.

Thank you for your participation!

Our next questions ask about other savings and investments you may have (such as checking and savings accounts, CDs, stocks, bonds, mutual funds, Treasury bonds), excluding those in a retirement account. We first want to know whether you made any contributions and/or withdrawals to your savings and investments over the last year. Please do not consider changes in the market value of the funds in these accounts, only consider the amounts of new money you added and the amounts you took out.

Would you say that over the last 12 months you  have added more to your savings and investments than you withdrew, or that you have withdrawn more from your investments and savings than you have added to them, or neither?^f('qhidInst')[5].label()^n

When you reach \( \text{Math.round(f('I23')[1].get())} \), (the age at which you expect to start collecting Social Security benefits), how much do you expect your monthly Social Security benefits to be in today’s dollars?

\[ f('qhidInst')[6].label() \]

\[ \text{NumericOnly(CurrentForm()+'1')} \]

\$ (1) ________________ per month (1)

### I25 - I25

In this question, we ask you to think about what you would do or plan to do if you reach \( \text{Math.round(f('I23')[1].get())} \) (the age at which you expect to start collecting Social Security benefits) and everyone’s Social Security benefits (as computed under the current rules), including your own, were cut by 30 percent. Would you...? \[ f('qhidInst')[24].label() \]
