Policy Expectations Survey

Please respond by Monday, July 23 at 5 p.m. to the questions below. Your time and input are greatly appreciated.

This survey is formulated by the Trading Desk at the Federal Reserve Bank of New York to enhance policymakers’ understanding of market expectations on a variety of topics related to the economy, monetary policy and financial markets. The questions involve only topics that are widely discussed in the public domain and never presume any particular policy action. FOMC members are not involved in the survey’s design.

Monetary Policy Expectations

1) Of the possible outcomes below, please indicate the percent chance* you attach to the indicated federal funds target range or target rate following each of the next 3 FOMC meetings:

<table>
<thead>
<tr>
<th>Date</th>
<th>Level of Target Range or Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>July 31-Aug 1</td>
<td>0.00% - 0.25%</td>
</tr>
<tr>
<td>September 12-13</td>
<td>0.25%</td>
</tr>
<tr>
<td>October 23-24</td>
<td>0.50%</td>
</tr>
<tr>
<td></td>
<td>0.75%</td>
</tr>
<tr>
<td></td>
<td>1.00%</td>
</tr>
<tr>
<td></td>
<td>1.25%</td>
</tr>
<tr>
<td></td>
<td>&gt;1.25%</td>
</tr>
</tbody>
</table>

Percentages should add up to 100 percent.

2) Do you expect any changes in the FOMC statement and, if so, what changes?

3) Of the possible outcomes below, please indicate the percent chance* you attach to the timing of the first federal funds target rate increase.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Percentages should add up to 100 percent.

4) Provide your firm’s estimate of the most likely outcome (i.e. the mode) for the federal funds target rate or range at the end of each half-year period and over the longer run:

For each half-year period:

- Dropout

For the longer run:
- Dropout

5) Of the possible outcomes below, please indicate the percent chance* you attach to the fed funds target rate or range 1 year from now and at the end of 2014.

<table>
<thead>
<tr>
<th>July 2013</th>
<th>Year-end 2014</th>

<tr>
<td>1.51 - 2.00%</td>
<td>2.01 - 2.5%</td>
</tr>
<tr>
<td>≥2.51%</td>
<td></td>
</tr>
</tbody>
</table>

Percentages should add up to 100 percent.

6) How would you grade the Federal Reserve System’s communication with the markets and with the public since the last policy survey on 6/11/12? Please provide a rating between 1 and 5, with 1 indicating ineffectiveness and 5 indicating effectiveness.

Rank: Dropout

7) FOMC communications have discussed several different ways monetary policy could be altered to provide either less or more accommodation.

a) For each listed policy tool, please indicate the probability the tool will be used to signal future policy tightening or to tighten policy at the next FOMC meeting and within the next 1 and 2 years.

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Provide additional guidance on the likely path for the size and composition of the balance sheet</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* i.e. a deliberate action to decrease the duration of the SOMA portfolio, independent of other policy changes.

b) For each listed policy tool, please indicate the probability the tool will be used to signal future policy easing or to ease policy at the next FOMC meeting and within the next 1 and 2 years.

<table>

* i.e. a deliberate action to increase the duration of the SOMA portfolio beyond the currently announced maturity extension program, independent of other policy changes.
d) Because respondents could see some of the choices from part b as overlapping, the answers to that part do not necessarily reveal the combined probability of various choices. We are interested in the probability you assign to any easing policy action that uses the SOMA portfolio – that is, those actions described in either row 2 or row 3 from part b above. Please indicate the probability these tools will be used at the next FOMC meeting and within the next 1 and 2 years.

8) Please provide your most likely expectation (i.e. the mode) for the amount of domestic securities held outright in the SOMA portfolio and for the expected level of reserves at year-end for each of the next five years.

Please comment on any risks you see to your forecast:

10) What percent chance do you attach to the 4-quarter change in the core PCE deflator falling below zero by the end of Q3 2013?

11) For the outcomes below, please indicate the percent chances* you attach to the annual average CPI inflation rate from 2017 - 2022. Please also indicate your point estimate for the most likely outcome (i.e. the mode).

| Percentages should add up to 100 percent. |
|---|---|---|---|---|
| 51.0% | 1.01-1.5% | 1.51-2.0% | 2.01-2.5% | 2.51-3.0% | 2.0% |

Point estimate for most likely outcome:

12) a) What percent chance do you attach to the US economy currently being in a recession*?

Recession currently: 

b) What percent chance would you attach to the US economy being in a recession* in 6 months?

Recession in 6 months: 

13) Please comment on any changes to your macroeconomic assessments since the last FOMC meeting.
