If applicable, please describe your expectations for any changes to key elements of and/or the communications regarding asset purchases going forward.

5b) The March 2021 FOMC statement noted that "the Federal Reserve will continue to increase its holdings of Treasury securities by at least \$80 billion per month and of agency mortgage-backed securities by at least \$40 billion per month until substantial further progress has been made toward the Committee's maximum employment and price stability goals."

Please provide your views on the most likely economic and financial conditions prevailing at the time that the Committee judges "substantial further progress" has been made toward its goals. If your views have changed since the last policy survey, please describe the factors behind those changes.

6) The table below lists the average spreads of selected money market rates* over the past week. Please provide your expectation for each of these rate spreads for the day after each of the FOMC meetings. Please ensure your signs are correct.

*Responses should add up to 100 percent.

10a) For the outcomes below, provide the percent chance* you attach to the annual average <u>CPI inflation</u> rate from April 1, 2021 - March 31, 2026 falling in each of the following ranges. Please also provide your point estimate for the most likely outcome.

11a) What percent chance do you attach to:

*NBER-defined recession

**Previous IMF staff work has suggested that a "global recession" can be characterized as a period during which there is a decline in annual per-capita real global GDP, backed up by a decline or worsening in one or more of the following global macroeconomic indicators: industrial production, trade, capital flows, oil consumption and unemployment.

11b) Please explain the factors behind any change to your expectations in part a since the last policy survey.

Thank you for your time and input. Please send survey responses to ny.mktpolicysurvey@ny.frb.org
