SURVEY OF MARKET PARTICIPANTS

MAY 2022

This survey is formulated by the Trading Desk at the Federal Reserve Bank of New York to enhance policymakers' understanding of market expectations on a variety of topics related to the economy, monetary policy and financial markets. The questions involve only topics that are widely discussed in the public domain and never presume any particular policy action. FOMC participants are not involved in the survey's design.

Please respond by Monday , April 25th at 2:00pm East time and input are greatly appreciated.	ern Time to the questions below. Your	
Type of Respondent: Market Participant Respon	ident Name:	
1a) Provide below your expectations for changes, if any, to the langth the May FOMC statement. Please write N/A if you do not exp	juage referencing each of the following topics in ect any changes.	
Current economic conditions:		
Economic outlook and communication on the expected path of the target federal funds rate:		
Communication on tools other than the target federal funds rate:		
Other:		
1b) What are your expectations for the Chair's press conference?

Level of the target federal funds rate or range at the effective lower bound (in percent): Por parts a-d, please explain the factors behind any change to your expectations, where applicable, since the last policy survey.	d) ^V	What is your estimate of the target federal funds rate or range at the effective lower bound?	
For parts a-d, please explain the factors behind any change to your expectations, where applicable, since the last policy survey.			
For parts a-d, please explain the factors behind any change to your expectations, where applicable, since the last policy survey.			
	϶) ϝ	For parts a-d, please explain the factors behind any change to your expectations, where applicable, since the last policy survey.	
	•		

^{*}Responses across each row should add up to 100 percent.

**Bins were chosen with consideration to the March Summary of Economic Projections.

The following matrix lays out hypothetical scenarios in which the realized levels of the 2023 unemployment rate (Q4 average level) and 2023 core PCE inflation (Q4/Q4 growth) are either 50 basis points above, below, or equal to the medians of FOMC participants' projections for these indicators in the current (March 2022) Summary of Economic Projections (SEP). For example, the upper left box represents a scenario in which the unemployment rate and core PCE inflation are both 50 basis points below the current SEP medians.

For each of the following scenarios, please indicate the level of the target federal funds rate or range that you expect would prevail at the end of Q1 2024. If you expect a target range, please indicate the midpoint of that range in providing your response.*

Please explain any assumptions underlying your responses.

^{*}For reference, a similar question was last asked in the November 2021 survey.

4a) Please provide your modal expectation for the <u>total net change in SOMA holdings</u> of U.S. Treasury securities and agency mortgage-backed securities (MBS) over each of the periods below.

If you expect SOMA holdings to increase on net in a given period, for example through net asset purchases, please enter a positive number. If you expect SOMA holdings to be unchanged on net in a given period, for example through reinvestments that result in no net change in holdings, please enter 0. If you expect SOMA holdings to decline on net in a given period, for example through maturities or paydowns that exceed any reinvestments or through sales, please enter a negative number.

Net change amounts referenced below are in \$ billions.

Net change in SOMA			<u>Total</u>	net change	over each p	period			
holdings:	April 2022	May 2022	June 2022	July 2022	August 2022	September 2022	October 2022	November 2022	December 2022
