

SURVEY OF PRIMARY DEALERS SEPTEMBER 2024

This survey is formulated by the Trading Desk at the Federal Reserve Bank of New York to enhance policymakers' understanding of market expectations on a variety of topics related to the economy, monetary policy and financial markets. The questions involve only topics that are widely discussed in the public domain and never presume any particular policy action. FOMC participants are not involved in the survey's design.

Please respond by **Monday, September 9th 2:00pm Eastern Time** to the questions below. Your time and input are greatly appreciated.

3) The following matrix lays out hypothetical scenarios in which the realized levels of the 2024 unemployment rate (Q4 average level) and 2024 core PCE inflation (Q4/Q4 growth) are either 50 basis points above, below, or equal to the medians of FOMC participants' projections for these indicators in the current (June 2024) Summary of Economic Projections (SEP). For example, the upper left box represents a scenario in which the unemployment rate and core PCE inflation are both 50 basis points below the current SEP medians.

For each of the following scenarios, please indicate the level of the target federal funds rate or range that you expect would prevail at the end of Q4 2024. If you expect a target range, please indicate the midpoint of that range in providing your response. Please provide your responses out to three decimal places.*
