

## SURVEY OF MARKET EXPECTATIONS JULY 2026

This survey is formulated by the Trading Desk at the Federal Reserve Bank of New York to enhance policymakers' understanding of market expectations on a variety of topics related to the economy, monetary policy and financial markets. The questions involve only topics that are widely discussed in the public domain and never presume any particular policy action. FOMC participants are not involved in the survey's design.

Please respond by **Monday, July 20th 2:00pm Eastern Time** to the questions below. Your time and input are greatly appreciated.

**1a)** Provide below your expectations for changes, if any, to the language in the July FOMC statement. Please write N/A if you do not expect any changes.

**1b)** What are your expectations for the Chairman's press conference?

**2)** How would you grade the Federal Reserve System's communication with the markets and with the public since the last policy survey? Please provide a rating between 1 and 5, with 1 indicating ineffectiveness and 5 indicating effectiveness.

Rating:

Please explain your rating. In addition, please discuss your expectations for any future changes to the FOMC's suite of communications as well as the timing of any changes you expect.

**3a)** Provide your estimate of the most likely outcome (i.e., the mode) for the target federal funds rate or range, as applicable, immediately following the FOMC meetings and at the end of each of the following quarters and years below. For the time periods at which you expect a target range, please indicate the midpoint of that range in providing your response (e.g. for 1.00-1.25 percent enter 1.125, not 0.0125).

FOMC Meetings

|                                                                                      |                    |                     |                    |                  |                    |                     |                    |

\*Responses across each row should add up to 100 percent.

**4a)** According to the implementation note issued June 17, 2026, the FOMC directed the Open Market Desk to "when appropriate, increase the System Open Market Account holdings of securities through purchases of Treasury bills and, if needed, other Treasury securities with remaining maturities of 3 years or less to maintain an ample level of reserves."

Please provide your expectation (\$ billions) for the amount of reserve management purchases of Treasury securities (in excess of MBS reinvestments) during the monthly purchase periods\* below. If you expect any of these amounts to be zero in a given period, please enter 0.

|                                                                             | Mid-Jul.<br>to<br>mid-Aug.<br>2026 | Mid-Aug.<br>to<br>mid-Sep.<br>2026 | Mid-Sep.<br>to<br>mid-Oct.<br>2026 | Mid-Oct.<br>to<br>mid-Nov.<br>2026 | Mid-Nov.<br>to<br>mid-Dec.<br>2026 | Mid-Dec.<br>2026<br>to<br>mid-Jan.<br>2027 | Mid-Jan.<br>to<br>mid-Feb.<br>2027 | Mid-Feb.<br>to<br>mid-Mar.<br>2027 |

Q4 2027:

Please provide the percent chance\* you attach to the following outcomes for the average unemployment rate in Q4 2027. Please ensure the probabilities are consistent with the 1st and 99th percentiles you provided above.

|          | ≤ 3.50%                  | 3.51 - 4.00%             | 4.01 - 4.50%             | 4.51 - 5.00%             | 5.01 - 5.50%             | 5.51 - 6.00%             | 6.01 - 6.50%             | ≥ 6.51%                  | Total                    |
|----------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Q4 2027: | <div><div>0</div>%</div> | <div><div>0</div>%</div> | <div><div>0</div>%</div> | <div><div>0</div>%</div> | <div><div>0</div>%</div> | <div><div>0</div>%</div> | <div><div>0</div>%</div> | <div><div>0</div>%</div> | <div><div>0</div>%</div> |

\*Responses across each row should add up to 100 percent.

Please also provide your point estimate for the most likely outcome out to at least one decimal place (e.g. for one percent enter 1.0, not 0.01).

Q4 2027:

7) Please indicate your modal projections for headline and core PCE inflation for each of the following quarters.\* Please provide your responses out to at least one decimal place (e.g. for one percent enter 1.0, not 0.01).

|                                                                     | Q2 2026 (saar)       | Q3 2026 (saar)       | Q4 2026 (saar)       | Q1 2027 (saar)       | Q2 2027 (saar)       |
|---------------------------------------------------------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
| Headline PCE inflation (percent):<br><i>Q1 2026 (saar): 4.6% **</i> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |
| Core PCE inflation (percent):<br><i>Q1 2026 (saar): 4.4% **</i>     | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |

*\*Percent change from the previous quarter at an annualized rate, based on the average of monthly levels (seasonally adjusted) in each quarter.*  
*\*\*Third estimate by the Bureau of Economic Analysis.*

8a) Please provide the 1st and 99th percentiles of your distribution of expectations for headline PCE inflation in 2026 (Q4/Q4). Please provide your responses out to at least one decimal place (e.g. for one percent enter 1.0, not 0.01).

*Note: The 1st percentile, p1, is the value such that the probability of headline PCE inflation being less than p1 is 1%, and the 99th percentile, p99, is the value such that the probability of headline PCE inflation being more than p99 is 1%.*

Percent:

9) What percent chance do you attach to:

the U.S. economy currently  
being in a recession\*  
(percent)?

the U.S. economy being in  
a recession\* in 6  
months (percent)?

the global economy being in  
a recession\*\* in 6  
months (percent)?

*\*NBER-defined recession.*

*\*\*Previous IMF staff work has suggested that a "global recession" can be characterized as a period during which there is a decline in annual per-capita real global GDP, backed up by a decline or worsening in one or more of the following global macroeconomic indicators: industrial production, trade, capital flows, oil consumption and unemployment.*

10) Provide your estimate of the most likely outcome for output, inflation, and unemployment. Please provide your responses out to at least one decimal place (e.g. for one percent enter 1.0, not 0.01).

|                       | Real GDP (Q4/Q4<br>Growth)* | Core PCE Inflation<br>(Q4/Q4) | Headline PCE<br>Inflation (Q4/Q4)** | Unemployment Rate<br>(Q4 Average<br>Level)*** |
|-----------------------|-----------------------------|-------------------------------|-------------------------------------|-----------------------------------------------|
| 2026 (percent):       |                             |                               |                                     |                                               |
| 2027 (percent):       |                             |                               |                                     |                                               |
| 2028 (percent):       |                             |                               |                                     |                                               |
| Longer run (percent): |                             | NA                            |                                     |                                               |

*\*Responses for real GDP growth in 2026 and 2027 are pulled directly from point estimate values provided in question 5.*

*\*\*Responses for headline PCE inflation in 2026 and 2027 are pulled directly from point estimate values provided in question 8.*

*\*\*\*Responses for the average unemployment rates in Q4 2026 and Q4 2027 are pulled directly from point estimate values provided in question 6.*
